INDEX OF THE NEWS MONDAY, PEBRUARY 18, 1906

Patience Needed to Solve Race Problem, Negro Declares

James Weldon Johnson, in Boston, Says Negro's Pri mary Concern Is Participation in Liberty Guaranteed Him by Lincoln

Once someone wrote, "Eternal vigilance is the price of freedom."

James Weldon Johnson, poet and publicist, musician, lawyer and sometime Unites States Consul at Puerto Cahello, Venezuela, and Corinto, Nicaragua, submitted an illustration of the truism in Boston when he explained at Ford Hall Forum some ways in which the Negro today is proceeding toward the realization of his primary concern, which is participation in the liberty guaranteed him by Abraham Lincoln.

Colored People. He stands, by virtue of his position and the tasks that are his, at an intermediary point from which, if it is possible for him to realize the full import of the Negro question, it is also possible for him to perceive how truly there is, as well, a white problem. He believes the happy solution of the tangle, certain to be brought about by the full active, very largely depends upon the exertion of patience; not inert participation in the liberty guaranteed him by Abraham Lincoln.

And Delegates in British And Delegates in String Associates Pair Plying through fog and rough the realize the full import of the Negro question, it is also possible for him to realize the full import of the Large Associates Pair Plying through fog and rough the realize the full import of the Negro question, it is also possible for him to realize the full import of the Negro question, it is also possible for him to realize the full import of the Negro question, it is also possible for him to realize the full import of the Negro question, it is also possible for him to realize the full import of the Negro possible for him to realize the full import of the Negro question, it is also possible for him to realize the full import of the Negro possible for him to realize the full import of the Negro possible for him to realize the full import of the Negro possible for him to realize the full import of the Negro possible for him to realize the full import of the Negro possible for him to realize the full import of the Negro possible for him to realize the full import

proceeding toward the realization of his primary concern, which is par-ticipation in the liberty guaranteed him by Abraham Lincoln.
"Once," he said, "the Negro was required to prove that he was a hu-man being. He did so by showing the human attributes of kindness, love, generosity and faith. He has gone about, for most of his 300 years here, tagged by an interrogation point. 'What,' it has been inquired, 'are we to do with the Negro?' You tee on public international law, pre-pared by Dr. Ricardo J. Alfaro, head of the Panaman delegation.

The outstanding feature of the proposal is its effort to provide such

pared by Dr. Ricardo J. Alfaro, head of the Panaman delegation.

The outstanding feature of the proposal is its effort to provide such a comprehensive system of tribunals that resort to some one of them would be unavoidable.

The report, which is the last of major importance to be presented, establishes compulsory arbitration except where this would be in conflict with constitutional precepts of one of the countries or sovereign rights of independence. ognition of his book of Negro sermons, "God's Trombones." Wide Scope of Utilities Inquiry of Vital Import to United States

Senate Committee Provided For by Walsh Resolution to Go Thoroughly Into Organization, Management and Growth of Companies

On the eve of the inquiry by a special committee of the Benate into the operation of public utilities corporations in the United States, as provided for by the resolution drawn by Thomas J. Walsh. (D.), Senator from Montana, the question arises as to what part, if any, politics is to play in it, and what it means to the companies, the investors, and the authorities. These phases of the subject will be discussed in four articles in THE

1. The Politics Involved WASHINGTON — Ordering an investigation of the public utility companies by a special committee of the Senate as provided for in the Walsh

resolution due thought has been given to the politics in the move. Here is a subject which might just as well have been inquired into by the Federal Trade Commission or some other branch of the Executive Department of the Government had it been intended that only constructive facts were desired.

Sanctuary in Danish Capital Has Novel Form For two weeks the Senate Committee on Interstate Commerce listened to arguments pro and con as to the advisability of authorizing an investigation of the public utilities. All the witnesses studiously avoided the admission of facts in those hearings, but the underlying purpose of the investigation was purpose of the investigation was threshed out pretty clearly. And it was obvious from the tenor of the questions asked and the answers given that a political issue was in the

NEW YORK—Sometimes a distinguished visitor arrives in New York from far-away shores without anyone being on hand to properly celebrate his coming. It is not easy for a visitor to accomplish this, for ship news reporters, according to reputation, never sleep.

Recently, however, there occurred one such unheralded arrival. There was no committee of welcome, no official address—not even a handshake.

HOOVER ENTERS PRIMARY RACE FOR PRESIDENCY

Permits Backers to Place His Name Before Ohio's Republican Voters

WILL NOT CONDUCT PERSONAL CAMPAIGN

Indorses Coolidge Policies Declares for Strict Account of Campaign Expenses

WASHINGTON-Herbert Hoover has emerged as an avowed candidate for President of the United States. The Secretary of Commerce, who has shown a disinclination to come out as a candidate under his own signature, took the advice of his friends and announced himself a candidate on a platform embodying "the principles of the Republican Party and the great objectives of President Coolidge's policies." In that sentence he cleared up two

making.

Mr. Walsh gave the committee this assurance: "I need not say to the committee that probably in view of my record in the Senate now for 15 years the fears that have been expressed that this will be a political investigation.

In that sentence he cleared up two moot questions, one his challenged aconsiderable length, and his position as an Administration candidate, pledged to carry on the policies of the Coolidge Administration.

His latter to considerable the considerable length, and his position as an Administration candidate, pledged to carry on the policies of the Coolidge Administration.

pledged to carry on the policies of the Coolidge Administration.

His letter to Col. Thad H. Brown, chairman of the Ohio Hoover for President Committee, outlined his stand and announced his purpose.

"I have received, through you and others, requests from very many Republicans of Ohio that I permit my name to be entered in the presidential primaries of that State," the Hoover letter to Colonel Brown said.

"I do so," he added, laconically.

Constructive Solution of Issues "I shall be deeply honored by whatever support the people of Ohio may decide to give me at the Republican National Convention. I shall be glad to serve the American people through the Republican Party in any way that I can in finding constructive solution to the many problems which confront

our country.

"My conviction that I should not strive for the nomination, and my obligations as Secretary of Commerce, preclude me from making any perpediate of the strive for the strive for the strive for the stripe of the st preclude me from making any per-sonal campaign. I must rely wholly upon my friends in Ohlo to conduct it and to conduct it in a fair manner with steadfast regard for Republican success in the State and the Nation. It is my especial desire that expendi-ture of many matt he arricitly limited "If the greatest trust which can be given by our people should come to me I should consider it my duty to carry forward the principles of the Republican Party and the great ob-jectives of President Coolidge's poli-cies—all of which have brought to

our country such a high degree of happiness, progress and security. Campaign Enters New Phase Now that Mr. Hoover has author

new phase. Opponents of his candidacy and supporters of other candidates have something tangible to take hold of. How long Mr. Hoover can continue to perform the duties of Secretary of Commerce and meet the demands of the politicians would seem to be un-certain, indefatigable worker as he is. No ground for a try-out could have been selected making heavier

it, or even make a good showing he is well enforced for the next stage of the campaign. If he fails, it will not stop him but it will encourage his opponents.
The fact that Walter F. Brown, his Assistant Secretary of Commerce, is from Toledo, and that Theodore Burton (R.), Representative from Ohio, is from Cleveland, indicates that the northern Ohio faction will be led to support Mr. Hoover. In

Cincinnati, the home of Nicholas Longworth, Robert Taft, nephew of Chief Justice Taft, is connected with the Ohio Hoover for President Club. Mr. Brown has gone to Ohio as Mr. Hoover's political representative to manage affairs there, and his resignation as Assistant Secretary of Commerce in the near future would occasion no surprise here. Senator Willis "Welcomes" Test Frank B. Willis, United States Senator from Ohio, whose campaign for the Presidential nomination has

been under way for some time, when informed of Mr. Hoover's step, "welcomed" him to the contest in Ohio. "Oh, very well," he said when the hover letter was read to him. "He's perfectly welcome to come in. I have been known to the people of Ohio for about 30 years. I know them and they know me. He will find out, at the close of the primary contest, whether he has been correctly added."

Grundtvig began his work in 1838, with a series of free lectures on history, the natural sciences, political economy, poetry and religion, given by himself and other capable speakers, in simple language. The audional folk songs, which formerly had been hymns, drinking songs and songs of new and war. Grundtvig and other Danish poets substituted for them songs of freedom and progress and songs of faith in God, and his beautiful hymns have become so familiar that they now re-echo in many a church and home in Denmark.

GERMAN REICHSWEHR TO AID GOVERNMENT

New Minister of Defense Makes Statement to Members

BERLIN — An army which is in the position to maintain the Reich's neutrality in case of an international neutrality in case of an international conflict by protecting its frontiers, thus enabling the Government to carry on its policy undisturbed, and which, moreover, can maintain peace and order at home in case of any serious disorder, is what General Gröner, the new Minister of Defense, intends to make the German Raichewenk to make the German Raichewenk.

man Reichswehr.

The army is to be a weapon in the hands of the constitutional government, he continued in his speech before the Reichstag budget committee, and will not lay stumbling-blocks in the way of the foreign political course of the Wilhelmstrasse. General Gröner wishes that the Reichswehr should embody the same patriotic feelings as the old imperial army, but he rejects the same patriotic feelings as the old imperial army, but he rejects the latter's rigid drill as no longer profitable and he greatly advocates a more careful intellectual training of men and officers.

The program as such does not differ much from that of his predecessor. Everything now depends, however, upon whether the new minister is able to carry it out.

REVISED FARM AID MEASURE DRAFTED

Equalisation Fee Retained in Restricted Form

Nary-Haugen farm relief bill, em-bodying in a restricted form the equalization fee, will be reported to the Senate by the Senate Agricul-tural Committee.

Charles L. McNary, (R.), Senator from Oregon, chairman of the committee and author of the modified measure, announced that he will send the bill to the Senate without committee hearings. With the measure before the Senate, Mr. McNary will let others press for its consideration.

He is of the view that the House should give first consideration to the issue. Other Senate farm legislation leaders disagree with this position and hold that the Senate should take the lead, pass a bill and put the matter up to the House.

They have compromised their views to the extent that Mr. McNary will report out his revised bill and the other farm leaders will undertake to obtain its early consideration. The changes proposed are designed to meet the objections of President Coolidge to the original McNary-Haugen bill.

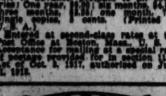

PATHE EXCHANGE GETS FILM BOOKING OFFICE

NEW YORK (P)-Announcement NEW YORK (A)—Announcement that Pathe Exchange, Inc., had acquired the Film Booking Office Pictures Corporation is made by Pathe Exchange. Known as FBO, Film Booking Office was rated as one of the largest nontheater-owning producers and distributors of motion pictures in the United States, and produced approximately 60 feature pictures a year. Joseph P. Kennedy, who purchased control of the organization two years ago at a reported price of about \$10,000,000, will remain to aid in the management.

LAND CLAIMS SETTLED

MEXICO CITY—Of the 774 claims abmitted for lands select for subsubmitted for lands seized for subdivision or for communal properties
by the Mexican Government in 1927,
according to the Department of Indemnities of the Secretariat of Agriculture and Improvement, 627 were
held by Mexicans and only 137 by
foreigners. Settlement of 102 claims
was effected by delivery of bonds of
the agrarian debt. Of these 28 were
daims of foreigners, with a value of
62,700,000, while the Mexican claims,
although more numerous, amounted
to but \$1,500,000. Seventeen claims
were thrown out by the authorities,
leaving the remainder to be settied.

THE CHRISTIAN SCIENCE MONITOR

During Our Annual FEBRUARY **FURNITURE** SALE

ate that the advice of LEAGUE RULE IN RHINELAND AGAIN PROPOSED

General Spears Favors French Withdrawal Now Instead of in 1935

BY CABLE PROM MONITOR HURBAU PARIS—An important proposal for solution of the Rhineland problem was heard by the executive commit was heard by the executive committee of Fidac, that is to stay, the
Fédération Internationale des Anciens Combattants, sitting in Paris,
when General Spears, fowner member of the British Parliament and
a recent visitor to Williamstown, addressed them.

Since Fidac comprises \$,000,000
former soldiers, its decisions necessarily carry weight. These members
belong to many lands. They represent a vastly varying opinion, but

beiong to many lands. They represent a vastly varying opinion, but on the whole, as civilians who were dragged into the armies in 1914 and flung back into civilian life in 1919, they are pacifically inclined and seek a solution of the difficult problems which still beset Europe.

Inconspicuous Officials Among the problems is the occupation of the Rhineland. The presence of allied soldiers on German territory makes a full rapprochement impossible. Dr. Gustav Strese-mann demands evacuation. Aristide Briand attaches certain conditions It is believed that after the recent oratorical joust, French and German Ministers will meet on the Riviera, where Dr. Stresemann, now spending a vacation before the next meeting of the League of Nations, will discuss the Rhineland question. General Spears' suggestion, which

will discuss the Rhineland question.

General Spears' suggestion, which is given new form but which was first put forward during the Ruhr occupation in 1923, is simply expressed that France should immediately renounce its occupation of the Rhineland instead of remaining, as authorised by treaty, until 1935. In return Germany should admit League of Nations control of the demilitarised sones. These sones are demilitarised sones, These sones are demilitarised by treaty, but although the League has a general right to supervise the execution of the treaty terms yet there is no permanent machinery for surveying the fulfillment of the disarmament clauses.

An investigation at present would be doubtful. It can only be undertaken after a specific complaint is received, which complaint will certainly be regarded as unfriendly. If Germany accepted regular, permanent control of the demilitarized zones, it would not add to its obligations, and the League commissioners would be a few inconspicuous officials. They would not be an army on foreign soil, as at present, humiliating and irritating Germany.

General Spears pointed out that if a bargain is not made soon France will have nothing to offer. In 1935, the occupation will end and nothing will replace it. If it ends now something satisfactory may replace it by agreement. Further delay will mean thing satisfactory may replace it by agreement. Further delay will mean that Germany will reject any proposal which is not in the treaty. But has not Dr. Stresemann already inti-

mated that he will reject new con-ditions respecting the Rhineland? Committee to Study Plan

General Spears acknowledges this, but urges that he finds a large body of German opinion ready to support the idea for the sake of immediate evacuation. Indeed the idea of a deal for the sake of immediate evacuation. Indeed the idea of a deal for the launching of the flying machine to be used for expediting the service, the idea for the sake of immediate evacuation. Indeed the idea of a deal for the launching of the flying machine to be used for expediting the service as small demilitarised sone on their territory. It would remove the contention that Germany is being ireated in an exceptional manner.

Unfortunately the French do not take this proposition of a demilitarised sone on their territory favorably. The Temps, for example, writes in certain fereign circles it is fasinuated that a French demilitarised sone should constitute a country for the German demilitarised sone should constitute a country for the is better to make it clear that it is a conception that we cannot in any direction in the treaty and constitutes a guarantee for security, for which we cannot furnish a country for the furnish a country for which we cannot furnish a country for the furnish a country furnish a country for the furnish a country furnish furnish furnished for a season furnished furnished furnished for a season furnished furnished furnished furnished furnished furnished for favorable furnished furnished f Committee to Study Plan

cause his views are to be submitted to a special committee for consideration and report. In Great Britain, Belgium, Germany and France this solution of the Rhineland problem will be earnestly discussed.

John Wanamaker BROADWAY AND NINTH STREET, NEW YORK

A great many changes have come to pass since the daynearly sixty-two years ago-when James Coward made his first pair of shoes.

Not only have styles changed, but business ideals have changed, too, with a whirlwind swiftness. Speed—production —volume sales—all these new aspects of a more modern in-dustrialism have stamped their patterns upon the face of the business world. The Coward business has had to keep pace—in some ways—for the years have brought us a growth of stupendous proportions.

But in all the onrush of bigger

sales—in spite of the fact that the first Coward shoe store soon became the largest single retail shoe store in the world—in spite of all this, the simple, old-fash-ioned purpose of that first James Coward still stands serene, untouched.

That purpose was to make finer shoes than might be expected. That purpose was to make better designs for greater comfort, to use finer leathers, to employ the utmost skill in workmanship. All this was the ideal and achievement sixty-two years ago. All this is our ideal and, we sincerely believe, our achievement today.

BRATT SYSTEM OF LIQUOR BOOKS and Tomoshire Dobishi, of administrative law, For IS DENOUNCED

Swedish Speaker Shows the Method Has Brought About Steady Drinking

STOCKHOLM—The twelfth annual Swedish Prohibition Congress was opened here on Friday by Gustaof Mosesson, Senator, with more than 300 representatives from state and provincial organisations present.

The first speaker, Pastor David Ostlund, denounced the Bratt system which gives book authorising liquor purchases to responsible citizens, as a danger to temperance declaring that it was proved that it encouraged regular and steady habitual drinking. The speaker showed that never during the past 55 years had there been so steady a consumption of liquor as during the last five-year period. The psychological effect of the book system, he said, was causing the refinement of drinking habits under the protection of the Bratt system which diminishes a healthy public reaction against liquor.

These books were responsible, he said, for the doubtful honor that Sweden now has 104,600 women buyers of strong drink. Fifteen years ago such a condition was unthinkable. The same law with its suggest.

League Resolutions

League Resolutions

WARSAW—The Polish Government, through its Foreign Minister, August Zaleski, has answered a note from the Lithuanian Premier, August Zaleski suggests that in future a stenographic report of the conversations between him and Mr. Waldemaras be taken and signed by both parties to avoid the accusation of misrepresentation such as was made by Mr. Waldemaras in his note to Poland on Jan. 16.

Mr. Zaleski asks the Lithuanian Premier to inform him explicitly whether Lithuania intends to carry The first speaker, Pastor David

buyers of strong drink. Fifteen years ago such a condition was unthinkable. The same law with its suggestion of fashion, said Pastor Ostlund brings every additional year more than 40,000 persons, chiefly the youth of the country, into the possestion of figure polys.

sion of liquor books.

A motion before this year's parliament to abolish the Bratt system is based on a desire to break off the yearly increase of drunkenness.

After Finland's experience with pro-After Finland's experience with pro-hibition, temperance advocates feel that a new method, possibly local option, must be tried.

POINCARE WARNS AGAINST PLOTS

Conspirators, It Is Said, Seek to Separate Alsace From Mother Country

BY CABLE TO THE CHRISTIAN SCIENCE MONITO STRASBOURG-Alsace is passionately and invincibly French. Such was the text of a discourse prowas the text of a discourse pro-document was timed to reach Kaunas. nounced in Strasbourg by Raymond It will be recalled that the Polish Poincaré, the Premier, who affirmed miserable squad of adventurers to

miserable squad of adventurers to conspire against the unity of France." He went in response to an invitation from nearly all the mayors of Alsatian cities.

Evidently the Government has information which would point to grave plots by autonomists, supported by foreign agencies, for the separation of the newly restored province from of the newly restored province from the mother country. It would seem that autonomists also exist in Brit-tany, Corsica and Flanders, though

M. Poincaré warned that France would not tolerate propaganda sub-sidized by foreign money, and vigor-ous police action is to be taken. He praised the loyalty of Alsatians in general, and declared that Alsace is

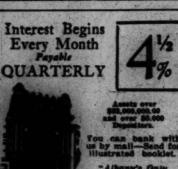

general, and declared that Alsace is as French as Wales is part of the British Isles. Astonishing revelations were hinted at.

The utmost enthusiasm has been aroused by M. Poincaré's visit, and his outspoken protest is commended, except in extreme quarters. The German Government is not implicated in these conspiracies, but it is certainly understood that German organizations and individuals are behind some of the unrest in the provhind some of the unrest in the prov-ince which spent half a century under an imposed German rule.

NEW YORK — Four professors from Japanese universities have just arrived here on the Berengaria of the Cunard Line, after making a study of European educational systems. Their survey convinced them, they said, that Japan is the equal of any of the modern nations in educational matters. They are Masato Masaki, professor of European history at Kelo University, Tokyo;

The National Savings Bank

versity.

The professors will make a short study of American universities and then return home by way of San Francisco. They passed two years in Europe_at the expense of the Japanese Government, surveying methods of education and equipment of European centers of learning.

EXPLICIT REPLY

Lithuania Asked Whether

Lithusnian frontier is still closed. The note arrived today. The Polish press has not yet commented on the note.

BY WIRELESS THOM MONITOR BUREAU LONDON-Mr. Zaleski's latest conribution to the Polish-Lithuanian controversy is not calculated to act as oil on the troubled waters, in the pinion of diplomatic circles here. Mr. Zaleski, it is pointed out, leaves unanswered all queries put by Mr. Waldemaras in his note of Jan. 16 and confines himself to a re-statement of the Polish case, that the Lithuanian interpretation of the League of Council resolution of December is untenable.

Moreover, the Polish Government has released the text of the note for publication in Warsaw before the press raised a loud outcry against Mr. Waldemaras for having done the same thing in January. It is anticipated here that a further attempt will have to be made to the League Council in March to bring the two parties to a more conciliatory frame of mind.

MISSIONARY COUNCIL TO MEET IN JERUSALEM

CHICAGO TRADE PARTY STARTS SOUTHERN TRIP

CHICAGO-The elimination of discriminatory freight rates between the Middle West and South has been signalized by the departure of a Chicago trade party for a tour in southern states. A much freer and broader exchange is expected to result from the removal of the artifiearly days when the Middle West was

confined to the East. As the West began to manufacture extensively it found it had a barrier o hurdle to get into the South which handicapped it on the disposal of its manufactured goods there, and for more than 30 years it endeavored to level the barrier. The Chicago busicovered with beadwork in vertical ness expedition commemorating this rows and horizontal groups and success and seeking to develop it fringed with dangling gold rings.

SINCLAIR BONDS REPORTED FOUND IN PARTY FUNDS

Senate Committee's Investigator Says They Helped Meet Republican Debt

SPECIAL PROM MONITOR BURBAU WASHINGTON - The associating a Liberty bond contribution to the publican National Committee with irry F. Sinclair's Teapot Dome ransaction finally brings into the pen a major purpose of the investi-ation into the oil leases that the Public Lands Committee is conduct-

The committee has been informed by a special investigator that all or part of \$75,000 in Liberty bonds part of \$75,000 in Liberty bonds which he says was given by Mr. Sinclair to Will Hays, then chairman of the Republican National Committee, to be applied to the 1920 presidential campaign deficit of the Republican Party, came from the block of Liberty bonds possessed by the Continental Trading Company. Mr. Hays has denied that he knew anything about the Continental company or any bonds owned by it.

ny bonds owned by it.

The affairs and purposes of this company and the disposal of the \$3,000,000 in Liberty bonds it is known to have held is what the committee endeavoring to uncover. Story of "Profits"

For several years the story has een current in political circles that

been current in political circles that the Continental Trading Company was organized by Mr. Sinciair and several other millionaire oil operators for "slush fund" purposes and that a very considerable part of its \$3,000,000 "profits" went into campaign funds.

The charge was most often repeated that the Republican Party was the beneficiary of this "slush fund." The allegation was never denied, but no positive evidence was had. The evidence said to be in the hands of the committee is declared to definitely hook up the Continental definitely hook up the Continental

sador extraordinary, who has made a wonderful goodwill flight through onal Committee. Mr. Hays and other Republican leaders will be called before the com-mittee for questioning. He has in-dicated his willingness to appear be-

fore the committee.

According to the information obtained by the committee through a special investigator, \$75,000 in Liberty bonds was secured from Mr. Sinclair by Mr. Hays and these bonds were transmitted by him to T. Coleman du Pont, Senator from Delaware, who sold them in November, 1923, and applied the cash proceeds to pay off the balance of two loans of the Republican Committee, amounting originally to \$266,000, at the Empire Trust Company of New York, of which company Mr. du Pont was then chairman.

the investigation.

Another item that the committee required cash at the moment the fine been after and which it already established is the information that Mr. Sinclair gave Albert B. Fall

M. T. Everhart, Mr. Fall's son-in-law, ful offenders to make payments on and he testified to the facts in the installments while they remain on early part of the committee's investi-

gation.

So far the committee has uncovered the disposal of \$1,105,000 of the \$3,000,000; \$230,000 to Mr. Fall, \$75,000 to Mr. Hays, and \$800,000 that James O'Nell, one of those involved in the Continental Company, returned to his own company, the Prairie Oil and Gas Company, in 1925. All this information has been uncovered by the committee since it began its operations early this year.

It is known that the committee, through the Treasury Department, is having a check made of the Liberty bond holdings of H. M. Blackmer, another participant in the Continental company. These securities are said to have been deposited in a New York bank, the name of which is known to the committee.

"We should avoid needless imprisonment and association with more confirmed criminals," he declared, "if such a thing can be avoided. The only means of doing this is to have speedy trails and speedy hearings and for small offenses impose the pinalty of a fine rather than imprisonment. The demoralization of the short sentence is to be found everywhere in America.

BILL TO CURB MOVING STOLEN GOODS INDORSED

National Crime Commission Is Seeking Legislation Against "Fences"

NEW YORK—Simultaneously with the introduction into the National House of Representatives of a bill to curb transportation and distribution of stolen goods from one state to another, Newton D. Baker, acting chairman of the National Crime Commission, has announced that organization's indorsement of the measure.

The bill, which has just been introduced by Florello H. LaGuardia (R.), Representative from New York, was prepared by a special committee of the commission. It takes the place of a previous bill which Mr. La-Guardia withdrew at the commission's suggestion.

The bill, entitled "The National Stolen Property Law," is one of the first pieces of national legislation to be proposed as the result of the commission's study of means "for the suppression of the criminal 'fence'."

The proposed law provides equal penalties for receiving, as well as for sending, stolen goods through the channels of interstate commerce. Its scope extends to shipments to or from a territory of the United States or from a foreign country into the United States. The maximum penalty provided is a fine of \$5000 and two years' imprisonment.

promise in a resolution urging resumption of negotiations for United States membership in the World Court, according to a circular issued by the American Foundation, Inc., which maintains the American Peace Award, founded by Edward W. Bok.

The resolution, introduced in the Senate recently by Frederick H. Gillett's considerable to the United States and the nations in the Court should be able to reconcile their differences in conference.

"Senater and the nations in the Court should be able to reconcile their differences in conference."

Almed at "Fence"

knew it to have been fraudulently obtained.

Federal legislation is essential in handling the traffic because "the business of receiving stolen goods is organized on a nation-wide scale," Mr. Baker declared.

"A peculiarity of this offense is that securing a complete case against the criminal is so difficult as to make him almost immune," he added.

Charles H. Tuttle, United States District Attorney for the Southern District of New York, took an active part in preparing the bill. Other prosecutors who served on the committee are Joab H. Banton, District Attorney of New York County; Robert E. Crowe, State's Attorney for Cook County, Ill.; Charles P. Taft Jr., and Robert M. Toms, Prosecuting Attorney of Detroit, Mich.

Canadian liquors to the United States Canadian liquors to the United States was set forth at a conference held in Washington between members of the Canadian Royal Commission on Customs and Excise and representatives.

PRACE BELIEVED SOON TO REST ON BUSINESS BASIS

Nations, Says Harvard Lecturer, Would Do Better to Trade in the Open

Business, rather than diplomacy, may be expected to contribute most substantially to world stability in the future, says Dr. J. Anton de Haas, William Zeigler Professor of International Relations at the graduate school of business administration at Harvard University.

The "business approach" is admirably suited for finding the solution for difficult international problems, Dr. de Haas, formerly of the University of Rotterdam, told the gathering of women at the international dinner, when he the North Atlantic Section given by the North Atlantic Section of the American Association of Uni-versity Women, near the close of their four-day conference.

"Business is beginning to assert itself in international relations," said Dr. de Haas, "and finding ways which lead to peace and stability by applying the same principles that make for sound business at home, namely, a decent regard for the rights and feelings of others, the willingness to play the game fairly and an earnest desire to avoid conflicts as wasteful and stupid.

"The business man knows that economically speaking the manufacturer of silks in this country has more in common with the Chinese grower of of cotton textiles who lives next door. He knows that economic internation-alism is an essential condition of modern civilization.

"And business has taken matters into its own hands. While diplomatic discussions take place with great decorum and secrecy, the principal industrial and commercial interests involved frequently reach private agreements among themselves remoying to a large degree the points of friction. The tremendous number of friction. The tremendous number of international private trade agreements is gradually rendering the trade barriers built between the countries largely ineffective."

Miss Mary E. Woolley, president of Mt. Holyoke College, also stressed the importance of women equipping themselves to be able to interpret the point of view of the party of the

the point of view of the party of the second part in America's interna-

Conversion of Gasoline Into Yapor and Generation of High Voltage Current Described

This is the second of a series of articles on airplane gasoline motors, pplementing the series on the construction and flight of airplanes. The st article of this motor series was published in the Pacific and Central itions of this newspaper for Jan. 5.

Article 2-Aircraft Engines By W. LAURENCE LEPAGE

THE previous discussion on the theory and operation of a gasoline aircraft engine, we have considered only the fundamental basis of the development of power from gasoline fuel. It will be recalled that two ga have been accepted without explanation, namely, the introduction gaseous explosive mixture into the cylinder through the intake valve the emition of a spark for igniting the mixture of gases at the proper ment. The question immediately arises—how is it that liquid fuel is

parts, the most important of is the mixing chamber and of secondary importance, the chamber. Referring to the dia-(fig. 2) it will be seen that the ixing chamber is connected at its oper end with the tube leading to o intake valves of the cylinders ille its lower end is open to the nosphere. In the mixing chamber atmosphere. In the mixing chamber is a jet consisting of a tube brought to a very small orifice situated in the middle of the mixing chamber at a point where it is narrowest.

The jet in the carburetor fills with gasoline. On the first downward stroke of the piston in the cylinder, namely the suction stroke, air is drawn enough, the mixing

namely the suction stroke, air is drawn rapidly through the mixing chamber, its speed being of necessity greatly increased as it passes the narrow portion (since the same amount of air must get through a much smaller space in the same time). This fast moving current of air sucks up a small quantity of gasoline from the head of the jet. As the fuel emerges rapidly out of the small hole in the jet it is separated into a vast number of minute particles which cause it to vaporize

convenient method of moving the wire near the magnet is to wind it upon a suitable former called an "armature" and rotate it between the poles of the magnet. Since the faster the movement the greater the electric current induced in the wire, the armature must be rotated at high speed and it will be obvious that the revolving of the armature causes the induced current to alternate rapidly since the winding of the wire changes direction every haif revolution with relation to the poles of the magnet. It has been found that the electricity so induced into the coil of wire, which constitutes what is termed a primary winding, is of low pressure and therefore incapable of overcoming the rasistance necessary to cause it to spark across the small gap between the two points of the spark ping in the cylinder and thus fire the explosive mixture.

Another coil of wire is therefore wound over the primary, this latter

the cylinders in the necessary We can now pass along to a consid-gaseous state for explosion by means eration of the various types of enof the spark which we have yet to provide. The sole purpose of the spark is to ignite the explosive mix-ture within the cylinder at the moment when the power stroke of the piston is about to commence and the gases are therefore under high compression. The problem, it will be seen, is to provide a means for creating a very hot, and therefore fat, electric spark in the cylinder at exactly the correct moment. The difficulty of doing this is the fact that the higher the pressure within the cylinder the harder it is to cause an electric discharge to jump be-tween two points or electrodes. How-ever with the aid of high tension electric magnetos this has been found possible and for this reason the

If a coil of copper wire with its or pole of magnet and is moved so literature. called lines of magnetic force sur-rounding the magnet, a current of electricity will flow through the wire in a certain direction. This is a long discovered phenomenon of magne-tism and electricity.

In order to utilize this phenom non, suppose that instead of using an ordinary bar magnet, a horse-shoe type magnet is employed. The most

FRANCE SCANS Another Step Forward ALGIERS-TO-CAPE RAIL PROJECT

Parliament Soon to Consider Tenders to Construct Such a Railroad

SPECIAL PROM MONITOR BUREAU PARIS-The French Governmen has decided to build a railway across the Sahara. This news is of paramoment. The question immediately arises—how is it that liquid fuel is proper is a gaseous mixture of gases at the proper arises—how is it that liquid fuel is proper is a gaseous mixture of gases at the same height as lips vapor and air? And again, what causes the timely electric spart?

These points are really quite simple to applicate the rect to the mixing chamber so that liquid the proper is a gaseous mixture of gases. The level is at the same height as the head of the jet. This is achieved by means of a small cylindrical metal float usually made of thin brass. As the realized that gasoline, while being the gaseline enters the float chamber the float rises until, at the predetermine the float chamber the float chamber the float chamber the float chamber to the primary light ammable is not explained that in the correct proportions. In an internal combustion engine whether for automobile to a distribution of the fluid is an internal combustion engine whether for automobile to a proper in the primary winding. However, since the current in the other through magnetic turrent in the mount importance in the story of the

> this year and April of next year a survey in full of the whole problem. This sum of \$500,000 is being put up by the French state to the extent of about one-third, by Algeria, by Morocco, by Tunis, by French West Africa and by three leading French railways now feeding the south of France. When the report is completed in 1929, the next step will be the appointment of a company to handle the whole undertaking. The suggestions to date given most credence is that the company to be formed will be made up of repre-sentatives of all the big French rail-ways. The capital needed, as estimated now to finance the scheme in its entirety, will be \$64,000,000, or mediately a paying proposition is not \$32,000 a mile for the 2000 miles of the line. That the railway will be imanticipated. On the contrary, it is felt provision must be made for the first few years to cover an annual

deficit of nearly \$3,000,000.

"office du Transsaharien" shall be set up, with funds behind it of \$500,000. The bureau will employ this money

GOVERNOR OF MAINE DEFENDS HIS STAND

Mr. Brewster Discusses "Party Loyalty" at Lincoln Dinner

SPECIAL TO THE CHRISTIAN SCIENCE MONITO PORTLAND, Me.—A defense of de-artures from political party lines in affairs of state was delivered by Ralph O. Brewster, Governor of Maine, in an address at the Lincoln Day dinner of the Lincoln Club of Portland. Speaking on "Party Loyalty" in answer to a challenge of Daniel F. Field, chairman of the Re-publican state committee, as to his Republicanism, Mr. Brewster asserted Lincoln, Roosevelt, James G. Blaine, William H. Taft, and other leaders of the party had at times shown the type of irregularity for which he spoke.

"These examples serve to remind us of our great heritage of loyalty that may properly divide between the obligation to the party and the obligation to the State," he said.

Frederick Hale and Arthur R.

Gould (R.), Senators from Maine, were other speakers at the dinner. Mr. Hale discussing the presidential altuation and declaring in favor of Secretary Hoover.

Political Organization Extremely Complicated **Under New Forms**

By SISLEY HUDDLESTON SPECIAL PROM MONITOR BUREAU .

PARIS-Before the war the organization of Europe was simple. There were two great groups—the Triple Entente (England, France, Russia) and the Triple Alliance (Germany, Austria, Italy, though Italy changed sides after the out-break of war). Now it is extremely

complicated.

Pierre Bruneau sets out the socalled danger zones of Europe. Germany has agreed to refrain from war
for the recovery of Alsace-Lorralne,
but has claims to Danzig, to the Polish Corridor, to Upper Silesia. The
internationalization of the Kiel
Canal is described as illusory. Austrie wishes to be joined to Germany. tria wishes to be joined to Germany. Hungary would like to recover its lost territories which went to Czechoslovakia, Jugoslavia, Rumania. Bulgaria has created incidents on Greek and Jugoslavian frontiers, and there is a movement for Macedonian au-

Bulgaria Seeks Outlet

Bulgaria also demands an economic outlet on the Ægean Sea, promised by the Treaty of Neuilly. commercial facilities at Saloniki—
though these have been largely
granted. Italy and Jugoslavia do not
agree about Italian control of Alhania. and are generally rivals on the Dalmatian coast and in the Adriatic. Russia laments its deprivation of windows on the Baltic, and covets portions of Poland, and Bessarabia which was attributed to Rumania. Between Lithuania and Poland there is a diplomatic struggle for the possession of Vilna. Turkey is not reconciled to the loss of certain zones of Syria and of Irak. In North Africa, Tangiers is the object of litigation. Italy makes serious Mediterranean and colonial revendications. tion of windows on the Baltic, and

M. Bruneau points out in this admirable résumé the fragility of a number of stipulations calling for demilitarisation. The League, how-ever, generally guarantees all fron-tiers and the independence of the various states. But it does not indicate precisely how military and eco-nomic sanctions are to be applied. The system of defensive accords has been greatly developed. To protect themselves against Germany and Russia, a number of countries have entered into agreements. er Treaties

Nor does M. Bruneau forget the treaty between Poland and Afghan-istan which has some importance ment and did not believe in the sysowing to the relations of the two tem now in force in India, as it countries with Russia. He also mentions the treaty of England with the Hejaz. Finally the Locarno pacts were signed, and the need of other pacts on Locarno lines in eastern Europe, central Europe, the Balkans, and the Mediterranean, is urged.

OLDEST SYRIAN PAPER CELEBRATES JUBILEE

BEIRUT-The fiftieth anniversary

BEIRUT—The fiftieth anniversary of one of the oldest Arabic newspapers in the world was celebrated here recently when the present proprietor of Lissan-ul-Hal was awarded the medal of Lebanese Merit by the President of the Republic.

Lissan-ul-Hal has been described as the most serious and most moderate paper in Syria, and was founded by a man of considerable literary merit, the late Khalil Sarkis. He was among the first to provide the printed letter types to the Arabic press, and this type, used at present in Egypt and Syria, bears his name.

LOWER POSTAL RATES
FOR NETHERLANDS

**Precial to The Christian Science Monitor The public the Dutch Government has agreed to relinquish 2,500,000 florins, or \$1,000,000 of its annual postal revenue. Lower postal tariffs, mainly for inland postage, will be reduced by 33 per cent, for post cards by 40 per cent. The minimum rates for general inland letters and

CO-OPERATIVE SOCIETY MAKES GREAT STRIDES

total sales amounted to £19,876,129, an increase of £3,008,113, or 17% per cent on the corresponding year of 1926. The total supplies from the various productive works for the 13 weeks were £5,967,535, being an increase of £869,839, or 14% per

cent.

Later figures than are shown in the report indicate that the total sales of the Co-operative Wholesale Society to retail societies for the 52 weeks ended Dec. 24, 1927, amounted to £81,246,437, as compared with £73,565,156 for the corresponding 52 weeks in 1926, an increase of £7,681,281 or 10.44 per cent.

CEYLONESE AID BRITISH INQUIRY

Commission Presided Over by Lord Donoughmore Considers Reforms

BCIAL TO THE CHRISTIAN SCIENCE MONITO BOMBAY-The Ceylon Reform Commission, presided over by Lord Donoughmore, like the Indian Reform Commission, is a purely British commission, as it does not include a single Celonese, but there has been no outcry on the part of anybody in the island. On the contrary, the various representative bodies, including the Ceylon National Congress, all placed their views before the commission.

The present Government in Ceylon bears a close analogy to that in In-Jugoslavia asks from Greece fresh dia. There is a nonofficial majority As in India, the Executive is irre-movable in so far as the Legislature is concerned and the Governor pos-sesses certifying powers to safeguard the administration. There are no parties in the council, with the result that every member expresses his individual opinion on any sub-

> The Ceylon Statutory Commission has been appointed in accordance with the pledge given by Lord Dev-onshire in 1923 to inquire and advise the Secretary of State for the Colonies in what direction the constitu-tion of the island could properly and conveniently be amended.
>
> The first witness examined was the

Colonial Secretary, A. G. M. Fletcher, who explained the working of the constitution. He stated that local bodies had been doing good work, but the country, generally, was not well advanced in such matters and urban councils were not inclined to take the responsibility of taxing themselves sufficiently for effective

local administration.

The Caylon National Congress
gave evidence just after the Colonial
Secretary had been examined. Its
representatives explained that they

Treaties of neutrality such as those between Russia and Turkey, Germany and Russia, are considered to be in opposition to the League Covenant—if not always in form, at least in intention.

M. Bruneau deserves praise for his painstaking enumeration of the cover 25 years of age and possessed

flection of capital from Ceylon—the prosperity of the island having been built up on British enterprise capital, which were still needed.

IN RESTORATION OF HEIDELBERG

Funds Collected in United States for Rebuilding of University

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR BERLIN-The news that Ambassador Schurman is collecting funds in the United States for the rebuilding of the University of Heidelberg has been received with warm appreciation in that town. The Ambassador himself has been a student of that university, where he attended courses on philosophy in 1878 and 1879 under Prof. Cuno Fischer. Last year he paid a visit to his old university

The University of Heidelberg is red ruins of the old castle.
For many years the university

buildings have been inadequate. There is especially a much-felt lack of spacious lecture halls. Plans for enlarging the buildings were dis-cussed as far back as 1912, but the war prevented their realization. Now the Government of the State of Baden, in which Heldelberg is located, has taken the matter in hand. Though it might seem best to re-

move the main building from its present location on Ludwigs Platz where it is crowded in by other houses, to a more suitable quarter, this is not intended by the town, which wishes it to remain in its historic surroundings. The town, how-ever, has purchased the adjoining houses and will pull them down in order to make room for the enlarging of the university building. Also another wing is to be added to the university building in the Graben Gasse. The cost of this work is estimated at 1,200,000 marks, half of which sum has already been col-lected by Ambassador Schurman.

Last year the establishment of a comfortable students' home was made possible by a generous gift from Mr. Sibley of Rochester, U. S. A.

NEW SALT MINE FOUND IN BULGARIA

Soldier's Discovery Proves of Great Value

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR SOFIA-The Ministry of Commerce and Industry has just announced that a very large salt mine has been discovered in the northeast part of Bufgaria. One day, several years ago, according to the ministerial report, a oldier, Stoyan Subbeff, went into a forest not far from the town of Provadia for wood. On returning, he discovered a little spring of very clear water, and when he took a drink from it he was very much surprised to note that the water was salty.

cent formation of a new "center" i Lithuania, affiliated to Amsterdam.

HELD IN WARSAW

Funds Are Lacking to Do

Good Work

SPECIAL TO THE CHRISTIAN SCIENCE MONITO

WARSAW-A congress was re-

of which was to discuss the ways and

means of improving the roads in Poland. These, as the Minister of Public Works, Mr. Moraczewski, said, in his speech, are notoriously bad. It

is true that improvements have been made, but in order to bring the Po-

lish high roads into proper condition material funds are lacking. In the opinion of the Minister a special tax

ought to be levied for this purpose. If the population admits the need of

good roads, it must bear a certain burden which will amply repay it-

An exhibition of maps, technical apparatus, stone-cutting implements of Polish manufacture, machines, and

so forth, are being shown. There are also photographs, models of bridges,

bridge-heads, buildings, statistic de-

tails and many drawings. The great-

est improvements are shown in the provinces of Lwow and Lublin. Also

the district of Lodz shows a praiseworthy progress. Moving pictures, mostly American, presented the latest

ROAD CONFERENCE

An engineer was eventually sent from Sofia to investigate the spring; and by means of a careful analysis ascertained that a liter of the water contained 45 grams of salt. In co-op-eration with a syndicate, formed for the purpose, the Ministry of Industry set out to make a thorough study of the whole situation, and, after sinking many wells with rather primitive tools, has come to the following con-

The layer of rock salt out of which the salt spring flowed covers an area of not less than 300,000 square yards, and is more than 300 yards thick. It contains in all probability not less than 250,000,000 tons of salt. At the present rate of consumption, this is enough salt to last all the people in Bulgaria 1250 years.

rists that annually brings its often glowing coals to an atten Newcastle is again at the Mont Chase, Carl Gordon Cutler, ries Hovey Pepper and Harley

Monks Chase, Carl Gordon Cutler, Charles Hovey Pepper and Harley Perkins are here again but Charles Hopkinson is not. True that he was at these very galleries only a few weeks before with a dassling display of his own water colors, but surely an encore is by no means out of place after auch a brave demonstration of pictorisi virtuosity as his.

Mr. Cutler takes the front line with his breesy landscapes, done with a commendable lightness of touch and directness of attack. Years of studious investigation of the problems of solor values and relations has brought him an easy command of an individual palette, one that achieves in most cases an intensive, high-keyed registration. He whips in his foliage with familike bursts of quick color, and he aligns his prismatic apprays to acquire as all-over effect of agreeable brilliance.

Mrs. Chase appears less persuasive this wear, her vigorously rhythmed

Mrs. Chase appears less persuasive this year, her vigorously rhythmed landscapes and seascapes having a strong sense of being coerced into patternistic groovings beyond what the facts of her several cases would warrant. Nature becomes unruly when unduly pummelled into uncomfortable formations. Mrs. Chase is, however, a water colorist of parts, and only needs a more patient attitude in her investigations of natural beauty to smooth out her dimeutites. Mr. Perkins is drier in touch and tone than formerly, and so his interesting landscapes do not win all the applause they otherwise might. Mr. Pepper still runs to cold and chalky color schemes and a considerable use of body color, all of which tends to keep his water coloring from advancing beyond a certain point.

At the same galleries are numbers

the applause they otherwise might.

Are peoper still runs to cold and chally color schemes and a state of the state of the color schemes and a state of the color schemes are sumbers of new potteries by Varnum Poor, who entors a permanent niche here and the color scheme scheme and a state of the color schemes and a state of the c

it is, Mr. Storrs handles his materials with tact and feeling, to judge from the diversified group of sculptural objects on display; and while his displays his greatest sain and inality. In stone, bronse, and at he rears up geometrically thought the first that catch the note he day in their linear, upstandsprigtliness, in their combination of metallic surfacing, and in ruse of sharp-cut, plangent de-Within the slender compass of the real of Mr. Storre's little studies hints aplenty for the reconding of the art of skyscraper conction, for the evolving of a new of building that will still her express the underlying ctural idea of our day. I should to see the new towers of Manan rise up in such a burnished aty as Mr. Storrs indicates, with two and rigid economy of material architectural detail that would them express all the shining lency of our metallic age. To the litectural fraternity I strongly mmend these studies of Mr. To as valuable points of departure.

Melbourne, Vic.

The same may be said of Norman Carter. All of the before-mentioned are likewise considerable landscapists, and big factors in establishing a national school in this important branch of painting.

Of the exemplars of landscape and in this country, probably repre-

The Pennsylvania Academy

The environment is rather stark; the walls are bare except for a gar-den hat, and the mussle of a sun, but the emphasis is not focused

In its viewpoint of subject matter.

Turning to landscape, "creative conventionalization" marks many an interesting canvas. There is, for instance, "Dead Chestnut Tree," by Ross E. Braught—though rendered in color, a composition reduced to black and white pattern essentials, with the white of light, and the black of shadow angularly expressed. It is a sharp, clear-cut, striking development of what might otherwise prove just one more landscape.

Another viewpoint is that of pat-

boat sails set for the morning's venture.

Fine original thought and feeling are not governed by a process of technique. It may be found in the most academic as well as in the most modern of canvases. In general, however, it is characterized by poise and simplicity. Thus Emil Carlsen's "Christ and the Fishermen" with its austere and beautiful sense of calm or in the same artist's study. but the emphasis is not focused upon the sordid elements of farm life, a fact which is truly significant in a traditional art period when many of the younger painters, and a few not so young, mistake crudity and vulgarity for modernism.

"George Marvin and His Daughter Edith" is truly a modern American painting, both in its execution and in its viewpoint of subject matter.

Turning to landscape, "creative land.

Fine original thought and two in the groups have carried off both the Widener gold medal and the McClees prize for an imaginative group.

The Widener medal was won by Albert Stewart for his "Polar Bear," a modern, more or less conventional its viewpoint of subject matter.

Turning to landscape, "creative land.

Ontic different in approach is the Clees prize went to Albert Laessle

Its cons an abourdity that the captain could have performed a miracle with such casual exactitude. This landfall is a wirgin gift to us by chance. Indeed, most smail islands, when lifted by a ship, have that suggestion about them. That is why they are the origin of the better legends of man, and the promise of earthly felicity. They are the dreams surprised in daylight on the ocean by the voyager, caught a thousand times; for quickness of allusion, which brings the idea before you without detail or quotation; nothing is equal to the miscellar man, and we know that a foot set on those importance of earthly felicity. They are the dreams

On Renewing Youth

who are not sometimes assailed by the tear of old age. The suggestion may come that they are losing what is considered to be the freshness of youth, and a depressing sense of age may ensue. Such an attitude, however, shows that the individual is accepting the false belief that life is in and of matter, with its inevitable concomitants of material birth, growth, maturity, and decay, and that because of his belief, he is evidencing the false sense of retrogression in his human experience.

What a revelation it is to such a one to learn, through the teaching of Christian Science, that life is not in matter to deteriorate or decay; that Life—the only Life he can ever reflect—is Spirit, God; and that man, who is spiritual, lives as the reflection of God, Life! He begins to know what the prophet Isaiah meant when he wrote, "They that wait upon the Lord shall renew their strength; they shall mount up with wings as eagles; they shall run, and not be recognized to find that mount up with wings as eagles; they shall run, and not be recognized to find that individual is accepting to the timple of some who went with him, he made the simple statement, "But I wholly followed the Lord my God." Caleb's appiritual integrity was a continual source of refreshment, "But I wholly followed the Lord my God." Caleb's appiritual integrity was a continual source of refreshment to him. He knew the value of true prayer.

The ability to wait upon God and thereby renew his strength was to insure this process of renewal and refreshment must be based upon some understanding that life is neither in nor of matter, and that God is the only life of man. Immediately this great fact is apprehended a new seed is planted in human thinking, the seed of life, not death; of development, not deterioration; of eternal youth in place of impending age. Then, instead of greeting each new day as one day less of life, one welcomes each day as an added opportunity to learn more of what Life really is, and one proves by increased health and strength what the und

years before when Moses sent him with others to search out the land boyond Kadssh-barnea: "Lo, I am this day fourscore and five years old. As yet I am as strong this day as I was in the day that Moses bring to his daily tasks not only the bring to his daily tasks not only the sent me: as my strength was then, even so is my strength now, . . . both to go out, and to come in." What a splendid declaration for one cessful accomplishment. of eighty-five to be able to make! of eighty-five to be able to make! [In another column will be found a trans-and surely the secret of his vigor lation of this article into Dutch]

"We Must Cross to an Island"

That island of Maundeville's, which is called Bragman, is only a curious name for one of the Hesperides, or Flushed with a tinge of dusky rose, the Fortunate Islands, or the Isles
of the Blessed. Some name it Eden
Flood the low sky, and duskier or Elysium. We place it where we The mist comes flooding in, and flows will and give it the name of our choice. But naturally it must be an island uncontaminated by the proximity of a mainland. Every man has And folds its arms about the town.

door vermeerderde gezondheid en kracht wat het begrijpen van God als het Leven iemand in zijne tegenwoordige ervaring schenkt.

howled with laughter, until other people in the parade began to notile, standing the circular arches may be seen and to throw out greetings as they passed: "Hey, you..." "Hello-hel

HERE are probably few people is not hard to find; for, again and who are not sometimes assailed again, when referring to that impor-

Lord shall renew their strength; they shall mount up with wings as eagles; they shall run, and not be weary; and they shall walk, and not faint." By daily waiting upon God in true prayer, one finds his strength renewed; for he is learning to live not by bread alone, but by the Word of God.

Perhaps there is no more striking case on record of this renewing of youth by communion with God than that of Caleb the son of Jephunneh, as recounted in the book of Joshua. Here we find one at what is considered an advanced age able to say, in speaking of the day forty-five years before when Moses sent him more of what Life really is, and one proves by increased health and strength what the understanding of God as Life brings him in his present experience.

On page 248 of the Christian Science textbook, "Science and Health with Key to the Scriptures," Mrs. Eddy writes, "Men and women of riper years and larger lessons ought to ripen into health and immortality, instead of lapsing into darkness or gloom." It is not necessary, then, that advanced years should mean that one is incapacitated for taking part in the conduct of affairs or for laboring for the uplifting and betterment of mankind; and to the extent value of mature judgment and broad experience, but the strength and vigor which will insure their suc-

Twilight

The pale grey sea crawls stealthily Up the pale lilac of the beach; A bluer grey, the waters reach To where the horizon ends the sea.

Capitol City Chess Club of Washington, D. C.

Samuel Reshevsky, famous chess prodigy, and Marvin Palmer represented Detroit on the first board and defeated N. S. Perkins and J. Bishop of the Washington club after 31 moves. Norman T. Whitaker, national tourney champion, of Washington, and A. L. Mutchler defeated Leon Stoleenberg, Michigan champion, and H. L. Van Norden, former tri-state champion. The game required 27 moves. The Detroit chess experts played at the United States Naval Reserve wireless station.

PENN FIVE'S VICTORY PUTS GREEN IN LEAD

RECORDS UPSET

G. Hudson and H. Trumpour Lose First Games in Mani-

Saturday and the standing therefore remains without any important alterations. Everton, Huddersfield Town and Leicester City with 35, 34 and 33 points, respectively, show the way and Bolton Wanderers, victorious Saturday, are four points behind the leader. A lapse by Manchester City enabled Chelsea to dig itself in again at the top of the second division wherein it now enjoys a lead of two points 40 to 38.

The games in the Scottish League were notable for the defeat of the Glasgow Rangers—their third of the season. They are still at head of affairs, however, with Motherwell, who defeated them Saturday, and Celtic close behind.

COLLINS TAKES AMATEUR TITLE

NEW YORK—James B. Collins won
the United States amateur pocket billiard
championship by defeating William A.
Rogera, 125 to 88, in the final at the
Masonic Club Saturday night. Collins
succeeds to the title of J. H. Shoemaker,
last year's champion, who finished in a
tie for second with Rogers and E. Fagan.
Collins, undetested during the entire
tournament, turned in a splendid game
last night. His play was even and his
stroking brilliant when the layouts demanded it. He had a pair of 14's for his
high runs against one of 21 for Rogers.

won the all-round senior men's championahip in the United States indoor
skating meet Saturday by taking third
place in the three-mile, the final event,
Lloyd Guenther of Detroit, Melvin
Johnson of Minneapolis and Edward
Roesch of New York were tied
for second place with 90 points each.
Miss Elsie Mueller retained her title as
women's national indoor champion when
she made a clean sweep of the four women's events skated, Miss Mueller's 440yard final time was a new national record. The old mark was held by Gladys
Robinson at 47 4-5 seconds and was made
in 1927.

COLLEGE WRESTLING RESULTS

for Class B Squash **Tennis Title**

Special PSON Monitor Burgar

NEW YORK—Gardner Hirons of the Columbia University Club, runner-up last year, and Robert J. Larner, member of the champion Class B and Class C teams of the Yale Club last season, will battle out the National Class B squash tennis championship Tuesday, as the result of the semi-final round matches, staged at the Harvard Club Saturday. They were the two leading selected players at the start of the tourney, and have stood out among a brilliant crowd of players in that class this season, having frequently defeated Class A ranking players in the various tourneys and team matches.

Their victories, though accomplished in four games, were by no means one-sided. E. G. McLaughlin, many players of the league's history of the man, scored the winning goal with less than four minutes left to play in the means one-sided. E. G. McLaughlin, many players of the league's history of the means one-sided. E. G. McLaughlin, many players of the league's history of the man, scored the winning goal with less than four minutes left to play in the means one-sided. E. G. McLaughlin, many players of the league's history of the man four minutes left to play in the final period on a brilliant rush, out-

ing players in the various tourneys and team matches.

Their victories, though accomplished in four games, were by no means one-sided. E. G. McLaughlin, another Columbia University Club player, has been disposing of other members of the ranking class men all through the tournament, and he carried Larner to double figures in two of the games and won one of them. The score was 15—9, 15—18, 17—14, 15—6. Only the greatest court craft and skill enabled Larner to cope with the forehand drive and court-covering ability of the lengthy Columbian. Larner is a well-trained player, and his stroking was the better, but only his ability to keep the ball from the walloping side of McLaughlin saved him from the defeat that had been meted out to Stuart M. Sperry, No. 1 of the Princeton Club; Frank A. Sleverman Jr., No. 2 of Fraternity Squash Tennis Club, and C. J. Mason Jr., No. 1 of Harvard Club, in previous rounds, by McLaughlin.

The struggle between Hirons and Arnold Wood Jr. of the Princeton Club was an old-time walloping con-Club was an old-time walloping contest, and the Columbian managed to retain his speed somewhat longer than the Princetonian to win by a score of 15—17, 15—5, 15—12, 15—5. Hirons has headed the Columbia University Club team all season, and though his team is not high in the standing, he himself has a brilliant record in both Class A and Class B team matches. Wood has played less, having recently returned played less, having recently returned from a vacation, but has been promi-nent in play since his return. Hirons was a trifle slow at settling

into his stride, and with Wood hitting with great power, many errors by Hirons ended the game in favor of Hirons ended the game in favor of Wood, after extra points had been forced by Hirons. But the balance of the match found Hirons using his power with greater steadiness, and though he was inclined to show his tendency toward wildness once more in the third game, he recovered in time to prevent the loss of the game. The summary: UNITED STATES CLASS B CHAM-PIONSHIP—Semifinal Round

Robert J. Larner, Yale Club, defeated E. G. McLaughlin, Columbia University Club, 15–9, 15–18, 17–14, 15–6.
Gardner Hirons, Columbia University Club, defeated Arnold Wood Jr., Princeton Club, 15–17, 15–5, 15–12, 15–5.

RAWLINS AND BAKER IN FINAL

New York and Boston Also Advance in United States Squash Racquets

PHILADELPHIA—Myles P. Baker of Boston, former Harvard University star, and present holder of the title, meets Herbert N. Rawlins of New York, also a former Harvard University player, in the final round of the United States squash racquets singles championship tournament of 1928 on the courts of the Penn Athletic Club, and the winner will hold the championship for the coming year. New York will meet Boston for the inter-city team championship.

Rawlins furnished the chief surprise of the tournament when he defeated J. L. Pool, captain of the Harvard University team, in the semifinal round Sunday. 13—15, 18—15, 6—15, 16—14, 15—7. It was a great match from beginning to end. In the previous rounds Rawlins defeated T. W. Bourke of Detroit and L. M. Baillier of Baltimore.

Baker reached the final round easily, winning two of his matches in straight games. In the first round he defeated J. S. Burke of Pittsburgh; in the second he defeated Wallace F. Johnson of Philadelphia, three games to two, and in the semifinals he defeated R. A. Powers of Boston in straight games. The summary:

UNITED STATES SQUASH RACQUETS SINGLES—First Round

J. L. Pool, Harvard, defeated E. H. Knox. Buffalo, 15—9, 12—15, 15—7, 15—8.

J. L. Pool, Harvard, defeated E. H. (nox, Buffalo, 15-9, 12-15, 15-7, 15-8, L. M. Balliler, Baltimore, defeated A. W. Smith, Buffalo, 15-9, 15-17, 15-11,

Leo Dandurand, part owner of the Canadiens, who has always been against changing the rules in hockey, has come out with a plan to help eliminate tie games. He would move the present blue lines nearer to the goals, which would enforce even more the anti-defense rule, and he also advocates the forward pass in all areas excepting across the lines. His ideas are likely to come up for discussion at the monthly meeting of the N. H. L. board of governors in Toronto.

The Canadian - American Hockey

The Canadian - American Hockey League playoff will start during the week of March 25, the second and third-place teams meeting in a home-and-home series, total goals to count, and the winner of this to meet the first.

SMITH ACQUIRES NEW TITLE
HOT SPRINGS, Ark. (P)—Macdonald
Smith, New York professional, today had
employed four of his characteristic successive low rounds to acquire a new
title, the South Central open, golf championship, which he took yesterday with
an aggregate of 233. Five strokes below
par for the 72 holes Smith was but two
strokes in front of Frank Walsh, Appleton, Wis., and Al Espinosa, Chicago. T.
D. Armour, national open titleholder,
ried for the next place with Henry
Culci, Bridgeport, Conn., and Leonard
Schmutte of Lima. O., the trio needing
289 each. R. A. Cruickshank, who was
unsuccessfully defending his title, contented himself with 291.

G. A, WOOD ACCEPTS CHALLENGE
DETROIT (P)—Commodore G. A.
Wood of Detroit, holder of the British
International trophy symbolic of motor
boat race supremacy, has accepted the
challenge of the British Royal Yacht
Club to defend his title this Fall. The
challenge was received by J. L. Barrett,
secretary of the Yachtsmens' Association of America, by cablegram, stating
that details would follow by letter. By
telephone from Miami, Fla., Wood expressed satisfaction that a challenge
had been made. The last British challenge was made in 1921 by the R. M.
Y. C., but the boat owned by Sir Mackay Edgar sank at the trials.

VETERAN PITCHERS EXCHANGED The Pittsburgh and New York National League Baseball Clubs engaged in an exchange of pitchers, Saturday, Victor Aldridge going to the Giants and B. A. Grimes going to Pittsburgh. Although Grimes had the better record of the two in 1927, Aldridge has not been in the leagues as long as his rival Aldridge was secured from the Chicago Cubs by the Pirates in the deal which sent W. J. Maranville to the Cubs. Grimés was obtained by the Giants from Brooklyn in January, 1927.

dbling his toast. "Did you read it, Mother?"

"To anjoyed every word of it," said Mr. Mouse, with the might, Willie Mouse jumped up from his sied has a drawed his tail like a whip."

"To anjoyed every word of it," said Mr. Mouse, "Mr. Mouse, "Mr. Mouse, "Mr. Mouse, "But observe he make ack, and issed Mrs. Mouse is tree or seventeen times. And then whis front legs around he table, and side." It's beautiful, but I can't see how he cost it."

"It offene of having what is called a large vocabulary," said Mr. Mouse. "But observed he make and threw his front legs around Mr. Mouse sixteen or seventeen times. And then whis front legs around Mr. Mouse sixteen or seventeen times. And then whis front legs around Mr. Mouse sixteen or seventeen times. And the should be a large vocabulary," said Mr. Mouse sixteen or seventeen times. And there whis front legs around Mr. Mouse sixteen or seventeen times. And the should be a large vocabulary," said Mr. Mouse sixteen or seventeen times. And there whis front legs around Mr. Mouse sixteen or seventeen times. And the should be a large vocabulary," said Mr. Mouse sixteen or seventeen times. And the whis front legs around Mr. Mouse sixteen or seventeen times. And the whis front legs around Mr. Mouse sixteen or seventeen times. And the whise front legs around Mr. Mouse sixteen or seventeen times. And the whise front legs around Mr. Mouses and threw his front legs around Mr. Mouses and threw his front legs and three whise front legs around Mr. Mouse sixteen or seventeen times. And the whise front legs with merry gles. And Wille plodded along up the hill. But will be plodded along up the hill. And the coasters all mass they climbed up the white merry gles. And Wille plodded along up the hill. And the coasters all mass they climbed up the world, just because they read the time of the part of the part of the part

The Double Surprise Party

The shird grade was very busy outting out paper leaves and flowers to decorate their school room. The air was so sweet and warm it seemed as if spring would soon arrive; in fact, Norton had brought a branch of pussy willow to Miss Martin that very morning. The buds were very tight and the little gray pussies could scarcely be seen, but Miss Martin had put it on her desk where everyone could see the pussies grow.

Perhaps it was the pussy willows that made them want to cut out apring flowers and leaves and talk about gardens. Mary Jane had just cut out a four-leaved clover and held it up for everyone to see.

"I had a four-leaved clover party once when I was only 4 years old," said Babette.

"Tell us about it, dear," said Miss Martin.

"Mother sent each one of my little marts her sent each one of my little meets her sent each leaves and then softly placed a little based in the softly placed a little based in trout of the sent little based in the softly placed a little based in trout of the sent little based in trout of the sent little based in trout of the softly placed a little based in trout of the seach. Twenty

"Tell us about it, dear," said Miss Martin.

"Mother sent each one of my little guests upstairs and in a few minutes ahe called us down again and gave us each a little basket and told us to hunt all over for four-leaf clovers, under the chairs and the couch and table, on the window sills and everywhere. The one who found the most four-leaf clovers received a prize.

pink tulips pasted on the windows, and there was a big sandbox in one corner where some tiny girls and boys were planting dandelions.

"Everyone put his hands over his eyes and don't peep until I say ready," said the kindergarten teacher.

But the little road didn't know and

the country. He let grass grow at each side, and children play on him,

and altogether he was the happiest little road imaginable.

2. A period of time.

3. Not common.

4. A line of light.

5. A kind of boat.

each a little basket and told us to hunt all over for four-leaf clovers, under the chairs and the couch and table, on the window sills and everywhere. The one who found the most four-leaf clovers received a prize. The clovers were made of green paper cut just like Mary Jane's, only larger, and had a candy in the center."

"Oh, I would just love to have a party like that," said several little girls.

"How would you like to give a surprise party to the kindergarten?" And Miss Martin smiled at the eager little faces. "We could make the baskets of colored paper and cut out lots of four-leaf clovers."

"But the candy, Miss Martin. We shall have to have candy, too. I have a nickel to buy some," and Ralph separated a nickel from the other things in his pocket.

"I'll buy the candy, Ralph, and you children shall make the baskets," and Miss Martin patted his curly head.

"Remember, it's a surprise, so we mustn't tell," said Miss Martin as they left for home.

head.

"Remember, it's a surprise, so we mustn't teil," said Miss Martin as they left for home.

Such busy little fingers and bright smiling faces there were in the third grade as they cut and pasted the bright colored baskets. It was such fun to be giving a surprise party.

Of course the kindergarten teacher had to be told just a little about it and she promised to save Friday afternoon for the party.

The kindergarten room looked like spring too, with yellow daffodils and spring too, with yellow dasfodils and protection, but it was very beautiful, pink tulips pasted on the windows, for what he had made it out of was

For several miles, he went along by the side of the main road and was as good as gold, listening to strange stories of things that happened in bygone days.

"The Romans passed over me," said the main road, proudly. "Then "Young fellow," he said, "you"!!

"Young fellow," he went into the wood, and turned to his heart's content. He was so happy to be free again and in the country that he hopped and he turned somerhaud and turned to his heart's content. He was so happy to be free again and in the country that he hopped and he turned somerhaud there are good to the island, until at length and the would never, never go back to town, where he grumpy.

"Young fellow," he said, "you"!!

"Young fellow," he said, "you"!! "The Romans passed over me," said the main road, proudly. "Then later the Pilgrims came this way, and still later mail coaches used to thunder over me on their way to thunder over me on their way to London. But now, alas, it is all motors, motors, motors from morning to night," and he sighed.

"Yes," said the little road, privately thinking that he would rather like a motor to run over him, and still trotting along as good as gold.

All at once he felt a tug at his

The Mail Bag

Millerton, N. Y.

Dear Editor:

I am 10 years old and I would like to correspond with some girl near my age.

I think an awful lot of the Monitor. I think Snubs is cuts; so is Waddles.

I like to write stories and poems. I still play with dolls and I like sewing for my dolls very much. I also like to be out of doors and romp and play. We play mostly with two boys who came from England, so I should like to correspond with some girl near London.

Moline, Illinois.

Dear Editor:

I am so grateful for every story for the children printed in the Monitor. This is the second time I have written to the Mail Bag, but the first letter you didn't print. I do so hope you will print this one.

I am 10 years old and in fifth grade.

grade.
I should like to correspond with someone my own age in England, as I was there last summer.
We sailed from Boston, where we visited the Publishing House and went to The Mother Church.
Eloise J.

The editor would also like to thank he following for their letters: Elaine L. William R., Eleanor M., Roz-

rom Holland). Homer L. (7). Spokane, Wash. Donald M. (8), Ravennas, O. (from

much fun.

I'd like to tell you about my little pet kitten. I call her Frizzle because she's so fuzzy. She has tricks too. When we hold up our hand in the air she jumps way up onto it and hangs there. I know you'd all love her if you could see her.

Phyllis D.

prancing, and took the rope with both paws, and began to walk. Henry didn't like that quite so much, and shouted "Giddap, Hossy!" but Henry knew better than to try and run up the Long Hill. And, as he had promised his mother, he kept well over to one side out of the way of the coasters who were sliding down.

It was a grand morning for coast-like and Willia Morning to coast."

It was a grand morning for coast-like and Willia Morning to coast."

to one side out of the way of the coasters who were sliding down.

It was a grand morning for coasting, and willile Mouse had hardly more than started up the hill before he met nearly everybody in Animal Town coasting down. There were the T. Wentworth Bears on their double-runner, with Mr. John Hare and Richard Fox and Squirrel, the editor of the Animal Town Gasette, and Mr. T. Wentworth Bear's old college chum and neighbor, Joseph Raccoon. Mayor John Bear was out on his sled coasting with Selectman Ichabod Fox. John Hare Jr. was coasting by himself, and so was his brother Benjamin, but Benjamin wasn't a very good coaster and every now and then Jimmy Raccoon, who wasn't a very good coaster and every now and then Jimmy Raccoon, who wasn't a very good coaster either, bumped into Benjamin Hare and bumped him right off his sled. But neither Jimmie or Benjamin Hare and bumped him right off his sled. But neither Jimmie or Benjamin minded a little thing like that, for it was all part of the fun.

Fox and Raccoon were out coasting on the same sled they used to take people sleigh-riding for hire. Young Joe Bear was coasting with his chum, Bobby Raccoon, but young Joe had one eye out for his father coming home from the grocery store, and if young Joe saw his father he would probably stop his sled so suddenly to ask for a carrot that it would be surprising it his chum Bobby didn't get dropped off behind.

New Young Joe saw his father he would probably stop his sled so suddenly to ask for a carrot that it would be surprising it his chum Bobby didn't get dropped off behind.

Now, as Mrs. Mouse had said, Willie had very short little legs and so he could only take very short little steps. And hardly had almost everybody in Animal Town met and passed Willie Mouse as they came coasting down the Long Hill before almost everybody in Animal Town

A city in Turkey comes to view.

coast on the Long Hill with nearly everybody else.

It was not very far to the bottom of the Long Hill. The little sled, after Willie had dragged it up through the tunnel from the Mouses's front door, slid easily over the snow. Willie mouse climbed up the Long Hill. At noon nearly everybody in Animal Town went home to lunch, and Willie trotted along with the rope in one paw, and would hardly have known that he was dragging anything at all except that he remembered how his mother had told him to be careful of Henry. Willie would have been careful of Henry willie would have been careful of Henry anyway, but of course what his mother told him made him even more careful. So every few minutes Willie looked back over his shoulder and waved one paw and his tail at Henry, and Henry waved both front paws and sandwiches, and folded up the paper was and wiches, and folded up the paper was and wiches. put them in the box on the sled, for she was a practical person, and knew that if Willie got to the top of the hill at all he certainly wouldn't get there till after lunch time. So Willie put the rope of the sled over a twig that was sticking up through the snow, and then he and Henry nibbled up the cheese and cracker sandwiches, and folded up the paper napkin, and Willie unhitched the sled from the twig, and Henry should Henry waved both front paws and his tail at Henry, and his tail at Willie, and laughed and shouted "Giddap, Hossy!" And then Willie pretended he was a horse, and pranced.

But when Willie got to the bot-

tom of the Long Hill he stopped they were three-quarters of the way prancing, and took the rope with both paws, and began to walk. Henry Mr. T. Wentworth Bear had told Mrs.

Gain in Output in January Breaks Record-Price Trend Is Upward

TAL TO THE CHRISTIAN SCIENCE MONITOR IN YORK, Feb. 18—Barometers the steel trade which have come to recently have borne out the ations made previously as to

the sharp movement in the industry.

The gain in steel ingot production during January was 26 per cent, the largest monthly increase in the history of the industry. The unfilled tonnage statement of the United States Steel Corporation showed the largest tonnage on books since March, 1926, with enough orders to keep the leading maker engaged at the present pace for four months without booking another order.

The composite price of finished steel is higher than a week ago. In fact, the present level is within 1 per cent of the composite figure of a year ago. This time in 1927 steel prices were on the down grade, whereas now the tendency continues decidedly upward. Some steel observers have been inclined to state that the improvement in the steel industry has been overrated. They say that the present improvement is only "seasonal." But whether seasonal or not, the steel makers welcome the improvement. The chances are that it will soon be shown to be more than seasonal. If production this month or next increases only 9 per cent a new high monthly production record will have been established.

Market Less Seasonal the improvement the "seasonal" But or not, the steel the improvement at it will soon be than seasonal. If the improvement at it will soon be than seasonal if sonth or next ingent of cent an ew high in record will have been as the corn of the seasonal it heavy of so-called for steel has largely to only truly applies in such as cotton ties plate, both of which displayed it only truly applies in such as cotton ties plate, both of which displayed it only truly applies in such as cotton ties plate, both of which displayed it only truly applies in such as cotton ties plate, both of which displayed it only truly applies in such as cotton ties plate, both of which displayed it only truly applies in such as cotton ties plate, both of which displayed it only truly applies in such as cotton ties plate, both of which displayed it only truly applies in such as cotton ties plate, both of which displayed it only truly applies in such as cotton ties plate, both of which displayed it is such as cotton ties plate, both of which displayed it is such as cotton ties plate, both of which has made the demand is on all metal in the dead of formerly was not a. Underground work, ing of pipe, is atill season operations go, but the conditions of the condition of the condi

Market Less Seasonal

Moreover the theory of so-called seasonal demand for steel has largely been exploded. It only truly applies now to a few items such as cotton ties and possibly tin plate, both of which are for handling crops which of course are seasonal.

The growing use of the closed automobile of course has made the demand for cars less seasonal. Building operations are now carried out in the dead of winter which formerly was not thought feasible. Underground work, such as the laying of pipe, is still seasonal as far as operations go, but the buying is evenly spread.

Some skeptics state that the higher prices for steel have not actually been paid. However, the very fact that so-called official prices are higher, since there is seidom more than \$2 a ton concession on steel when such a concession is made.

Cold-finished bars have been the

normal quotas or more than normal except the oil industry. The automo-bile makers are the most conspicuous purchasers at the moment. Fabricated structural steel is in enormous de-

Non Ferrous Markets

The prospects for a large consumption of tin plate this year do not seem as bright as a month ago. It is true that carried-over stocks of canned goods from other seasons have about been wiped out. However, there is an enormous production of fresh vegetables which heretofore depended on canned goods during the winter. Canners are being urged to produce sparingly in 1928.

Tin was again the spectacular performer among the non-ferrous metals. It made a net decline of nearly 2c a pound over the week, selling near the close at 52% a pound, the lowest since April, 1925. The bargain prices brought out the heaviest sales in a week in more than a year, the turnover in this country having been 2500 tons.

JANUARY CHAIN STORE SALES VOLUME SETS A NEW HIGH RECORD

Sales of the 14 leading chain store systems for January totaled \$46,703,-722, compared with \$41,916,877 for January, 1927, an increase of \$4,786,345 or 11.4 per cent, according to compilation of George H. Burr & Co., specialists in chain store financing. The total is a new high record for January sales for chain stores.

J. C. Penney Co. led all other systems in point of dollar gain with total sales of \$7,721,677 for the month, compared with \$6,330,659 for January, 1927, an increase of \$1,391,020 or 21.9 per cent. In point of percentage gain J. J. Newberry Co. led with sales of \$357,892, compared with \$565,032 in January, 1927, an increase of \$273,880, or 44.5 per cent. Kinnear Stores and F. & W. Grand Stores followed in percentage increase with gains of \$2.3.2 and 22 per cent respectively.

Because of the generally prosperous condition of the country, chain store

GOOD DEMAND FOR LEATHER IS REPORTED

Sole and Offal Active at Higher Prices-Patent Buying Heavy

Sole leather tanners continue firm in their offerings, with no abundance to draw upon to meet the daily demand. The shortage is especially featured in the choicer tannages. Sole cutters, in particular, find the scarcity of the better tannages a hindrance to prompt deliveries.

Oak sole leather tanners are booking new business at the advanced price levels. A tannery run of clear steer backs sells freely at 66c. The branded backs bring 64c to 62c. Shoe manufacturers are contracting for fair-sized blocks of bends at 75 to 70c.

Finders' bends of the choicer selections are listed at 85c to 80c. The demand for bends is not quite so good as it has been, but prices are firm. Texas X bloom bends continue strong at 90c. Ordinary Texas tannages are listed at 85c to 70c.

Offal Supply Short

Offal Supply Short Offal Supply Short

Oak tanned offal of all selections has a steady demand, Boston and New York markets being sold down to bare floors. Rough double shoulders are moving in car lots at 60@58c. Single shoulders, as they run, are quoted at 56@54c. Prime bellies continue to be well sold up at 36@35c, with ordinary lots selling at 34@32c. Heads sell well at 25c, with a second run obtainable at 23c.

Union tanned sole leather is having

at 25c, with a second run obtainable at 23c.

Union tanned sole leather is having a steady demand. Choice tannages of packer steer backs are offered at 66c. Cow backs are 64c. Selected bends sell readily at 76c. Buyers for shoe manufacturers are holding a bearish attitude, bidding two cents under the market rate.

There is a good call for country hide backs at 60c. The supply is short and receipts irregular. Union offal has a demand sufficient to keep floor stocks sold close to daily receipts.

Prices are strong on all selections. With a three months' demand ahead of them, tanners are inclined to be bullish. Shoulders are selling at 52c. Bellies are well cleaned up at 32c. Heads are active at 24c for the better sort, with 22c asked for cheaper lots.

Calfskin Demand Better Calfskin Demand Better

Calfskin Demand Better
Calfskin tanners report a week of steady trading of fair proportions.
Market advances are holding strong. Choice lines of chrome tanned plump weight skins are listed at 62 to 60c. Regular tannages of the heavier selections are selling at 55 to 50c. The call for modish colors in the lighter weights is improving.

Side upper leather is selling in a moderate way. Prices are reported strong. Chrome sides from selected hides are quoted at 42 to 40c. Prime seconds are 38c, with a good third

selling freely at the wide range of 36 to 32c.
Sides of extreme measurement are in good call, top selections bringing 38c. A prime medium sold at 36c, with the cheaper sort well sold up at 34 to 32c. Combination tannages are selling close to receipts.

part of what new business comes to the leather markets. The two big pro-ducing markets of Boston and Phila-delphia are hard pressed to make sat-

asked, namely 44c to 40c.
Glazed kid is not as brisk as formely. A conspicuous shortage occurs in the cheaper selections of kid from 149.7 to 145.7, substantial declines from 140 to 18c. There is an abundance of the finer grades ranging in price from 80c down to 60c, but skins from 40c to 35c or 30c and under are well sold up.

Factory Employment at High Level-Railways Report Earnings Gains

OTTAWA, Feb. 13 — Business in Canada continues along satisfactory lines, with indications of a good season ahead in all branches of trade and industry.

The employment situation, which commands close attention during the winter, has so far caused very little complaint. Factory employment has been at a higher level than for eight years.

to 32c. Combination tannages are selling close to receipts.

Split Leather Active

Split leather is active. Raw stock is below what is regarded as a normal supply. Flexible splits are in good demand.

Chrome tanned shoe lining splits are moving in sizable quantities, new business being active. Top grades are offered at 15c. Selected seconds are 14c, the lower grades going at 13c to 11c.

Domestic trade continued generally fair. Wholesale business in the Maritime Provinces is normal. The very mild weather at the beginning of the month hampered retail trade somewhat, but average winter weather is again general, and business is reported to be improving.

In Montreal and other Quebec centers a very fair volume is reported by dealers in wholesale groceries. Dry goods show an improvement and clothing generality is moving well. Dealers in boots and shoes report a

Our booklet, "Maturity Table," tells the story of the Orange County Building & Loan Association, located in prosperous Orlando and Orange County, Florida. Assets have grown from \$11,000 to \$3,340,997.81 in six years. 3641,-683.78 has been paid in dividends to 3,000 stockholders. Interest payable semi-annually. Shares offered at par, \$100, without bonus or commission of any kind. Write for booklet.

Development Association

Development Association

Says Economic Outlook
for 1928 Good

BY A STATY CONSESSORDET

SAN PRANCISCO—The economic outlook for California during 1925 is good, with normal or above normal business activity during the first six months, according to a survey of 1927 in this State just issued by the California Development Association.

The report asserts that no intelligent concept of business conditions here can be gained without taking into consideration the population growth of the States, which since 1920 has been about 60 per cent throughout the State as a whole, or more than 100 per cent in the southern counties.

An analysis of the report shows that crops for which the 1927 per acre restock on a four-for-one basis, the new stock on a four-for-one

Live stock industries have had a profitable year, and the outlook for 1928 is excellent, according to the report. The outlook for beef cattle is the best it has been since 1920. The sheep industry has increased, and there was a large and profitable movement of lambs to market in 1927. Wool prices have advanced. Returns to dairymen were larger than in 1926. The situation in the poultry industry improved

were larger than in 1926. The situation in the poultry industry improved during the latter part of 1927, and the present outlook is favorable.

Manufacturing activities in California during 1927, as reflected by employment, was from 1 to 3 per cent higher than in 1926 during the first four months of the year.

Construction activities in California continued at normally high levels in 1927, and the outlook is for an increase in 1928, particularly in highways and public utility extensions. New funds for state highway construction have been made available by the additional 1 per cent gas tax, which will total \$15,100,000 for the biennium, in addition to the regular budget of \$32,259,000 Highway expenditures by counties will total \$25,000.000 for 1927, and will be increased in 1928.

Heavier Retail Sales

cally all within the range of the per cent.

Bank clearings in 20 reporting cities in California totaled \$23,367,394,000 in 1927, compared with \$22,717,952,000 in 1926, an increase of .03 per cent. The cities of Los Angeles and San Francisco furnished \$3 per cent of the total clearings reported. Clearings as a measure of business activity have been affected in those cities by the rapidly increasing volume of stock and bond exchange transactions, and generally by bank consolidations and changes in price levels.

by bank consolidations and changes in price levels.

The benefits of industrial and agricultural diversified production are clearly shown in this analysis, and despite some of the retarding factors, this state progressed and, as has been stated, is looking forward to increased substantiality in 1928.

Farmers' Income

Total income of California farmers during 1927 will average practically the same as in 1926, although the individual extremes of high and low returns which make up this average were wider apart than usual, states the report. The farm value of field crops in 1927 was \$166,000,000, compared with a five-year average of \$177,000,000, and the farm value of fruit and nut crops was \$220,000,000, compared with a five-year average of \$210,000,000. The farm value of the vegetable and truck crops will approximate \$60,000,000.

Among the crops below average in per acre returns to the grower were beans, potatoes, apples, peaches, prunes, cherries, figs and grapes. Grapes and apples returned the growers more money than in 1926, however. Preliminary estimates of the value of moneral production in California during 1927 are \$377,000,000, compared with \$450,000,000 in 1926. Of the \$73,000,000 decrease, \$65,000,000 is accounted for by lower prices and lower total value of petroleum. At the close of the year, oil production and stocks had declined somewhat and the outlook was sightly improved. Salines and industrial materials increased in production and value during 1927, while metals decreased.

The part the United States is playing a supplying the capital requirements of he world is evidenced by the fact that pproximately 400 separate foreign dolar bond issues have been underwritten at this country in recent years compared with approximately a score or more because of the world war, according to a comfliction just published by Brown instehers & Co., in book form. Theseonds originated in 35 different councies.

LOS ANGELES GAS & ELECTRIC Net earnings of the Los Angeles Gas & Electric Corporation for 1927 were \$4,-655,676, after taxes, interest, depreciation and amortization, compared with \$2,876,-344 in 1926. These earnings equal \$24,10 a share on the outstanding 6 per cent preferred stock. The balance available for common stock, all of which is owned by the Pacific Lighting Corporation, after preferred dividend requirements, was \$3,495,258, or \$17.45 a share.

Independent sheet steel makers opened to second quarter at quotation solven for second quarter at quotation solver miles are operating at 70 per ent capacity, Pittsburgh steel strip there at 70 per cent to 80 per cent, makers at 70 per cent to 80 per cent, makers with 80 per cent to 85 per cent month ago. WESTINGHOUSE PROFIT LOWER

Air Brake's Many Activities Stabilize Earning Power

the southern counties.

An analysis of the report shows that crops for which the 1927 per acre returns were higher than the average for the last six years include bariey, hops, cotton, apricots, olives, oranges, lemons, raisin grapes, wainuts and cantaloupes. Cotton, citrus fruits and wainuts were particularly profitable.

Live Stock Profitable

Live stock industries have had a live stock industries have a live stock on a four-for-one basis, the new stock was placed on \$2 annual division at live stock on a four-for-one basis, the new sto

share of its earnings on the same of the ers.

Westinghouse Air Brake has an old established business in railroad air brakes and along with that a large number of new lines, some of which are already yielding good returns and others which have great promise.

New types of railway signal apparatus, automatic train control. paratus, automatic train control, Hannauer car retarders, radio power units and automotive brakes consti-tute the newer and more rapidly

budget of \$32,259,000 Highway expenditures by counties will total \$25,000.000 for 1927, and will be increased in 1928.

Heavier Retail Sales

The volume and value of retail sales by firms reporting to the Federal Reserve Bank were larger in 1927 than in 1926. Adjustments of the data on wholesale and retail trade which have been made to eliminate the effects of cyclical fluctuations and long-time trend of growth indicate that both were below "normal" during 1927.

Financial conditions in California cities as reflected by the ratio of loans to deposits in reporting commercial banks at the beginning of 1928 were uniformly good, and in most cases showed an improvement over a year ago. Deposit-loan ratios were practically all within the range of 80 to 80 per cent.

Bank clearings in 20 reporting cities as reflected to report net earnings for 1927, after all charges of approximately \$35,00,000, equal to about \$5.10 a share on 459,706 shares of no par. This result would compare with \$1,736,298, or \$3.85 a share on 459,706 shares of no par. This result would compare with \$1,736,298, or \$3.85 a share on 459,706 shares in 1926.

Earnings for 1927 représent a gain of approximately \$3.50 and \$1,238,779, or \$2.38 a share on 429,960 shares in 1926, and \$9.00 per cent over 1926, indicating the triumph of intelligent advertising and a sound merchandising policy over one of the worst years, from the point of view of weather, the soft drink business has experienced. A cold, rainy summer was the only factor which kept Canada Dry from showing an even larger gain over 1926. It continued to demonstrate ability to maintain substantial sales volume during the winter, showing an increase in profits for both fifst and last

during hte winter, showing an in-crease in profits for both fifst and last quarters of 1927 over corresponding quarters of the previous year, as indi-cated in the following:

Canada Dry the last year has maintained its policy of disbursing to stock-holders a liberal proportion of earnings, and of increasing the disbursement as earnings continue to grow.

FOUNDATION CO.'S

NET PROFITS OFF LONDON-"Total value of contracts in hand at present is in excess of £2,000,000," John G. B. Stone, acting chairman of Foundation Co., stated at the annual meeting. "In our

ing chairman of roundation Co, stated at the annual meeting. "In our main department—that of general engineering—the development and expansion at home has been steady and satisfactory. In Australia and India, where we now are actively employed, prospects are promising."

Net profit of Foundation Co, for the year to June 30, 1927, after making provision for all administrative charges and allowing for depreciation of plant and equipment, amounted to £21,055, compared with £45,423 for the previous year. After adding the balance from 1926 of £18,503, a total balance of £37,558 was available.

This balance was dealt with as follows: taxation £5000, preliminary expenses £5528, dividend on the cumulative participating preferred shares at the rate of 3 per cent less tax £9600, balance carried forward £17,430.

The reduction in net profit, the directors state, was due to the unforce.

£17,430.

The reduction in net profit, the directors state, was due to the unforeseen reaction of the general strike and coal dispute of 1926, which caused delay in carrying out contracts.

IMPROVEMENT IN PARAMOUNT NET

Paramount Famous Lasky Corpo-ration estimates its net profit after depreciation and taxes for the year ended Dec. 31, 1927, at \$5,050,000, in-cluding its undistributed share of sarnings of Balaban & Klatz, a 65 per cent owned subsidiary, equal after preferred dividends to \$12.83 a share on 579,327 average number of no.page.

preferred dividends to \$12.83 a share on 579,327 average number of no-par common shares outstanding during the year, as compared with net of \$5.600,815 or \$10.82 a share on 459,020 average number of common shares outstanding in 1926.

Net profit for the fourth quarter of 1927 is estimated at \$2,400,000 after above charges, equal to \$3.82 a share on an average of 588,690 common shares outstanding during the quarter as compared with \$1,960,000 or \$3.14 a share on an average of 574.590 common shares in the fourth quarter of 1926.

FAIR POND CREEK **POCAHONTAS PROFIT**

Pond Creek Pocahontas Company in the 1927 calendar year earned a little more than \$200,000 net for the 125,000 shares of stock. This is after all charges and reserves and is equal to something over \$1.60 a share. For the 1926 year the company reported net available for the stock of \$79,695. equivalent to 64 cents a share. Production in 1927 was \$25,951 tons, compared with 739,685 tons in 1926.

The bulk of the 1927 profits came in the middle months of the year. The Sept. 30 quarter alone produced net of about \$99,000, or almost half the gain for the full year. In the final three months' period profits and output both tapered off rather sharply.

PITTSBURGH Feb. 13-Meeting of tockholders of Pittsburgh Steel Com-

Stock Exchange Holiday In observance of Lincoln's birthday, the New York Stock Exchange, the Curb Market, Cotton Exchange and other commodity markets and the banks were closed today. The Boston Stock Exchange also was closed.

NEW FINANCING

In addition to corporate financing there were \$113,808,000 foreign govprovincial and municipal ed in United States markets

loans offered in United States markets during January, 1928, contrasted with \$1,452,000 in December and \$55,587,500 during January, 1927.

South American divisions brought out \$90,808,000; Continental Europe sold \$19,000,000; and Canada offered \$4,000,000.

Corporation and governmental new issues in January, 1928, aggregated \$838,454,100, compared with \$23,287,-150 in December and \$609,174,585 in January, 1927.

anuary, 1927.

Industrial and public utility Industrial and public utility corporations ran neck and neck in January 1928, with the former slightly in the lead with \$324,342,100 to \$320,356,600, followed by heavier than usual rail offerings of \$79,947,400. There were 17 corporate issues of \$10,000,000 or more, compared with 18 in December and 16 in January, 1927.

Real Estate Demand Less Demand for new capital by hotel, apartment, building, and kindred real estate corporations fell to \$68.255,000 in January, 1927, contrasted with \$88,-525,000 in December and \$73,494,000 in January, 1927.

Amounts of bonds, notes and stock

January, 1927.

Amounts of bonds, notes and stock issued by domestic, Canadian and foreign railroad, industrial and public utility corporations in January, 1928. for each class of security, follow:

Jan Bonds Notes Stock Railroad \$60,346,000 \$10,305,000 \$9,296,400 Indust'! .193,479,000 12,800,000 18,653,100 Pub util.211,309,000 1,710,000 107,337,800 Total ...485,134,000 24,815,000 334,637,100 Approximately \$208,242,000 out of the total of \$724,646,100, equal to 28.7 per cent, was used for refunding operations. This compares with \$267,393,000, or 31.8 per cent in December and \$98,865,000 or 16.2 per cent in January, 1927.

SOUTHWEST SEES RAPID GAINS IN

LOS ANGELES—Continued rapid development in the Southwest in 1927, marked by growth in factory output in southern California and by improvement in agricultural and livestock industries generally, is noted by the Los Angeles Chamber of Commerce in its monthly Southwest Business Review. The outlook for 1928 is fayorable.

prices attained at the end of the period.

Manufacturers in Los Angeles metropolitan area in 1927 were valued at more than \$1,300,000,000, a gain of some 2 per cent over 1926.

One hundred new manufacturing industries came into the district during the year. These included Ford Motor Company, B. F. Goodrich Rubber Company, Firestone Tire & Rubber Company, Truscon Steel Company and S. Karpan Brothers, whose plant investment alone will exceed \$42,000,000. Practically all these plants will be in operation duging 1928. The most notable expansion of existing plants was the construction of a sheet mill by Columbia Steel Company. Los Angeles manufacturing area now has about 190,000 factory workers on the payroll.

TEXAS & PACIFIC COAL Texas & Pacific Coal & Oil Company in preliminary statement for year ended Dec. 31, showed net income of \$315,190, after depreciation, depletion, amortization, and other charges. After crediting account with profit and loss credit of \$616,262, surplus was \$931,452 before dividends. In 1926, company reported net profit of \$1.578,043 after depreciation, depletion, amortization and other charges.

ISLAND CREEK COAL CO. Island Creek Coal Co. started off the new year with a gain in production in January of almost 19 per bent over the abnormally low figure of December. January output was approximately 114. 900 tons, or some 55,000 tons above the total of 343,888 tons for the month before. In January, 1927, production was

COCA COLA PROFIT sa Cola Company showed net profit he year ended Dec. 31 of 39.163.155-interest, federal taxes and re-a compared with 55.463.655 in 1926. In 1927 were 532.515.501, compared \$30,107.273 in 1926. Net income is to 59.16 a share on 1,000,000 shares compared with 516.50 a share on the share in 1926.

MARINE PLANE KEEPS CONTACT

the S.S. Creole

by the Navy for the Marine forces in Nicaragua. The Navy is much elated with the working of the radio aboard this plane as well as with the success of the flight itself.

RADIO

TO NICARAGUA

The Navy Bureau of Aeronautics recently recommended the award of a contract to the Eclipse Machine Company for a single-cylinder gasoline engine for test for emergency aircraft radio use. At the request of the Bureau of Aeronautics, the company some time ago undertook the development of such an engine, and its progress has been so satisfactory that it is believed a suitable solution of the problem of emergency radio generators has been reached.

The Economy of Peace

RESIDENT COOLIDGE, in his address Pexplaining the operation of the national budget system, found the occasion opportune to explain the Administration's attitude toward the maintenance of necessary or adequate sea defenses in time of peace. This policy is now awaiting congressional approval, and in the meantime it has come under severe critism both at home and abroad. Because of this t is interesting to analyze the President's posidon, which is approved by his official advisers and, apparently, by what may prove to be a deciding majority or a controlling minority in

First of all it is observed that the President sees fit to emphasize the declaration previously made—the sincerity and soundness of which cannot be questioned—that the proposed naval building program contemplates only the requirements of the United States, with no thought of the country entering into competitive construction with any other nation. He does not seek to obtain approval of his program by emphasizing an immediate or pressing need to meet some actual or imaginary emergency. He does not "view with alarm" the activity, past or present, of any friendly foreign power in naval construction. Quite naturally he sees in such preparedness to keep the peace the same economy which he recommends as a fixed

American policy. A striking feature of the President's address was that emphasizing or comparing the tre-mendous cost of war with the almost negligible cost of government in time of peace. From 1917, when the United States entered the World War, to 1919, the national debt increased from slightly over \$1,250,000,000 to almost \$26,600,-000,000. It has required the practice of the most rigid economy, coupled with the imposition of an unusual tax burden, to reduce the debt by \$8,500,000,000 in eight years. Since 1917, it was pointed out, the United States has paid more than \$17,000,000,000 in interest and principal on its war obligations.

With this realization there comes, inevitably, the conviction that the greatest economy is that which contemplates comparatively modest expenditures for the adequate policing of land and sea with the assumed assurance that the temptation to attack by any unfriendly power will thus be lessened. This is not the argument of the pacifists or of those who see, or claim to see, the implements and armaments of defense or reasonable preparedness to resist or over-come lawless force as inciters to war. The peace officer who walks his beat goes measurably equipped to combat such resistance as enemies of the law may offer. He does not thereby invite attack. Rather does he maintain and support the law's activity, meantime maintaining order and insuring the safety of the

people and their property.

Any comprehensive discussion of the situation which has developed and upon which the Administration's naval construction program is predicated, must take into account the historical background which affords a true perspective. For the moment it is necessary to look back only to the period immediately following the close of the World War. Great Britain then undertook definitely to curtail naval construction. It even did away with what is known as the home fleet. But there was begun, in 1921, a new program of capital ship construction. Winston Churchill, following the signing of the armistice, is quoted as having declared: "Nothing in the world, nothing that you many think of, or dream of, or anyone may tell you; no arguments, however specious, no appeals, however sequetive, must abandon that naval supremacy on which the ds, however seductive, must lead you to

life of our country depends."
In 1926, W. C. Bridgeman, First Lord of the Admiralty, who was one of the British representatives at the Geneva conference which met in June last, is quoted as having said: "There is always a little danger in talking about a onepower standard. That only exists in regard to battleships and ships of large size. It would be very dangerous thing for Great Britain to llow it to be thought that we could be satisfled with a one-power standard in cruisers, for example. In cruisers we want to feel that we are at any rate superior to other countries and

are able to protect our trade."

A glance backward to the period immediately following the late war discloses the fact that it was then for the first time that British supremacy on the seas was actually challenged by the United States. The American Congress had, in 1916, authorized construction, within three years, of ten first-class battleships, six cruisers, and a large number of smaller vessels. Because of the demands upon the shipyards and upon man power after the entrance of the United States on the side of the allies, this program was delayed. At the close of the war the program of construction was resumed. It was officially announced that it was the purpose of the United States to build a navy equal to the most powerful sea force maintained by any nation of the world. Had this program been carried out the American navy would have sur-passed in strength that of the British navy by

It was in the midst of what promised to be an era of intense competition in naval con-struction that the American Government struction that the American Government invited the four other naval powers, Great Britain, France, Italy and Japan, to the Washington conference. It was finally agreed, as everyone knows, that the United States abandon its 1916 program and that Japan give up its "eight-eight" program. Under this agreement the American and British fleets were to be sinally equal, while Japan's would be 30 per t of the combined strength. This, of course, lied to capital ships only. As a result, these three powers actually scrapped a total tonnage of approximately 1,644,839. The United States, acting in pursuance of the Washington agreement, dismantled and destroyed thirty-two ships. The contract was kept by the other

arrived at respecting the number of auxiliary naval craft, though the size or tonnage of indi-

vidual craft was limited. It soon appeared that the United States was equipped with fewer cruisers than Great Britain. It was then that the wisdom of increasing the number of American craft of this class was discussed, not avowedly for the purpose of maintaining actual parity, but that the correct relation between battleships and smaller craft might be established. It was estimated that this would require the building by the United States of twenty-one cruisers of 10,000 tons each.

But even as long ago as 1923 it was proposed, in the hope of rendering such construction unnecessary, to undertake negotiations with the four powers which might lead to an agreement as to relative parity similar to that regu-lating the larger ships. In spite of this it developed that just prior to the Geneva conference the British Government had forty-eight cruisers completed, with a total tonnage of 240,036. In addition it had a total of eleven cruisers building, with a tonnage of 110,000, with three others authorized and appropriated for, and nine projected. The United States had ten first line cruisers and twenty-two of the second line,

with ten building and six appropriated for. It is recalled that in a message to Congress in 1927 President Coolidge, in announcing that he had taken the initial steps preparatory to calling the Geneva conference, declared that competitive armaments constitute one of the most dangerous contributing causes of international suspicion and discord and are calculated to lead to war. The soundness of this premise is not questioned. But the attempt is made, avowedly by the President in behalf of the United States, and inferentially by an accredited spokesman for Great Britain, to show that the present naval programs of these friendly countries are based upon the peace needs, rather than the estimated war needs, of each individually. Mr. Bridgeman, speaking only a few days ago, is quoted as according to the United States the right, subject to the Washington treaty of agreement, to build whatever fleet it deems necessary for its own defense. He of course reserves the same privilege for his own country. "It is inconceivable," he said, "that either America or Britain should intend aggressive, warlike ideas in these days. Let us go quietly on with what we think necessary for ourselves, and let us hope if they build a larger navy their navy will be as great a factor in the preservation of the peace of the world as the British navy has been." This speaker is the same Mr. Bridgeman already quoted as having refused to consider even the possibility of permitting any nation to challenge Britain's supremacy upon the seas.

His discussion of the subject was predicated upon the possibility of renewing the negotiations interrupted at Geneva. He signified the willingness of Great Britain to go farther than it has already gone in limiting sea armament when "other countries do the same." This assurance should strengthen the hands of those in the American Congress who are seeking to reserve to the President the power to interrupt or suspend the proposed naval building program whenever, in his discretion, this may be deemed wise and prudent.

When a City Is Not a City

TERE size in territory and population and sheer height in buildings may bulk large in the estimate of ordinary folk regarding what makes a great metropolis, but other considerations are of far more importance in the eyes of certain authorities. Thus New York, which proudly lays claim to being "the second largest city in the world," is classed as low as 12 per cent a city, while Nantucket, a modest 100-year-old hamlet on an island off the New England coast, is regarded as 95 per cent perfect, so far as good architecture and environment are concerned. London, with its stately and historical claim to being "the largest city in the world," finds itself classed as but 9 per cent of a city and Chicago, sometimes called the "miracle city of the West," is allowed a bare 8 per cent. But that delightfully quaint Dutch city of Amsterdam in Holland is awarded 85 per cent.

Thus are claims to superlativeness about as futile as comparisons are odious in the eyes of city planners, architects and municipal beautifiers. But, according to Charles H. Cheney who has worked out his rating in the Journal of the American Institute of Architects, Paris of all cities saves the day for the larger municipalities, for the French capital is credited with being 90 per cent of a city. While other cities have just grown willy nilly, Paris deliberately set about beautifying itself seventy-five years ago and today it is reaping the benefit of a definite plan of development.

Main streets that amble amiably and ramble aimlessly the length of some American cities, which themselves have little breadth of plan, are called "terrible." The criticism of some English cities is about as severe.

But communities having established some definite architectural control come in for high commendation. Washington, one time called "the city of magnificent distances," is rated at but 25 per cent and the fine arts commission of the capital of the United States is called upon to exercise control over the type and color of its buildings before it is too late. Some cities in Florida are highly commended as building in the right direction. The hopeful sign is that a start has been made and there is an increasing appreciation for building cities to plans, specifications and a vision.

The Machinery of Farming

THE United States Secretary of Labor, James J. Davis, has called attention to the fact that because of the use of machinery on the farms, a tendency which has been rapidly growing, there is today a much smaller demand for farm labor. This testimony is borne out by a recent survey made by the National Industrial Conference Board, which finds that agricultural output per worker during the first quarter of the current century has increased about as much as has the output of industry per worker. It is acknowledged, however, that during this same time industry has scored great gains, while agricultural prosperity has declined.

The findings of the board are in substance to the effect that from 1899 to 1925 the output per

worker employed in industry increased 49 per cent, while the output per worker on farms increased 47 per cent. In both instances the increase was due to the machinization of the processes of labor in industry and on the farm. The change on the farm has been the result of the improvement in agricultural machinery, and so efficient has such machinery become that manufacturers of this class of goods are finding ever-broadening markets for it throughout the world. The spread of agricultural machinery, very naturally, opens up new fields for agricultural developments abroad. The sources of production of farm products are in like proportion increased, and American farmers are finding, consequently, an increasingly competitive market for their goods.

Here is a new adjustment being enforced upon the American farmer. The transition from an agricultural country to a manufacturing country has been most marked in the United States. It is not entirely dissimilar to what has been experienced by England, for example. The National Industrial Conference Board shows that whereas some 24.4 acres per man are cultivated in the United States, only about 9.5 acres per man are being cultivated in England. In many of the countries of Europe an even greater dependence is placed upon imported agricultural products. Under such circumstances there is a more pressing need there for the machinization of farm activities if it can be accomplished without unduly enhancing the capital invested in such operations.

The problem, after all, is not so much the relative output per man today on the farm as it is the total cost of farm operations. Investments in lands and machinery constitute no small proportion of the problem. If the returns on such outlays are not comparable with the returns obtained on industrial operations, then the relative position of agriculture is out of alignment with industry. Being out of alignment, the conclusion is reached that agriculture in the United States is depressed. The problem, therefore, is to find some means of correcting this discrepancy. It seems clearly established that efforts to explain away the agricultural depression, so called, have been rather futile, but plans for the correction of this situation have continued ineffectual because, they are chaotic and fail to obtain unanimous support. Only through the most careful research will it be found whether the remedy lies in cheaper credits, cheaper transportation, less costly market operations, or a revaluation of farm investments. But a satisfactory solution will continue to be lacking until such fundamental facts are disclosed.

"Aren't I?" Oh, No!

DISCIPLES of greater flexibility in the English language now ask the literary world to accept "Aren't I?" as a fit and proper substitute for "Am I not?" Sticklers for purity, of course, are shocked at the suggestion, while even the great army of followers of "Ain't I?" express their disgust over a proposal that is based upon no more legitimate grounds.

"Am I not?" is declared to be too cumbersome by such an authority as Prof. Samuel Moore of the University of Michigan, who has thrown the mantle of his approval upon "Aren't I?" and thereby given it a status it has not hitherto enjoyed. "Ain't" appears in most dictionaries, but apparently with no idea of giving it any standing, as it is knocked down as speedily as it is set up with the significant little battery of italicized words-"colloquial or illit-

But "Aren's I?" as a contraction of "Am I not?" presents something analogous to a grammatical anamorphosis. How "Am I not?" can be squeezed down into "Aren't I?" passeth the average understanding. Placing a perfectly good 'Am I not?" in a letter-press or similar device and subjecting it to several hundred pounds pressure, an experimenter would find, if he found anything at all, not an "Aren't I?" but either the ancient and offensive "Ain't I?" or a peculiarlooking and certainly no less offensive "Am't I?"

Thus far no outstanding authority on the English language has boldly come forward with an indorsement of "Am't I?" as an economical substitute for "Am I not?" And yet a quasi approval has been given to such a transparent distortion as "Aren't I?" which, to use a colloquial expression, "hasn't a leg to stand on' when it is submitted to the most casual grammatical test. _

Editorial Notes

Concerning his purchase of the Hartford Times, Frank E. Gannett, who owns a "chain" of newspapers in the East, says he does not consider his latest purchase as his personal property or as an organ to serve personal ambition or propaganda. "A newspaper is a great public trust," he adds. "We know and sense our duty in the management of this trust." Judging from the reputation of the other Gannett newspapers in the communities they serve, Hartford readers need have no misgivings about the future of its historic Times.

The radio transmission of faces, whatever else it may lead to, has certainly knocked a Shakespearean comedy line down from off the height of the purely ridiculous. "Now will I to the chink," says Nick Bottom, "to spy an' I can hear my Thisby's face." Not only could Nick now turn his misspoken line into a statement of fact, but he could also "see a voice," by means of the "talking film," and thus wriggle out of another of his blunders.

Edwin Scrymgeour says his party has one advantage over others in the British Parliament. It is not divided. This, of course, is true, since he is the only member. Ardent supporters of pro-hibition will join Will Rogers, in his remark applied in a different direction, and wish that he

It is said that the cost of one German cruiser equals that of 5000 farms. If this is so, the fact provides a telling argument for those who would turn implements of war into plowshares.

Many a bachelor of arts paterfamilias is finding that a lingering memory that Gaul was divided into three parts isn't sufficient in help-ing the fillos and fillas with their Latin.

The Diary of a Political Pilgrim

FROM A LONDON CORRESPONDENT IN THE UNITED STATES

TN PREVIOUS articles in this series I have endeavored ! to record some impressions of the external aspects of American civilization after an 8000-mile tour from one end of the United States to the other. I am now, in a final article, going to essay the more difficult task of appraising the movements which are taking place in its inner consciousness and feeling. For that is the more important side of the design. portant side of the two.

America's contribution to modern civilization has been very great. The circumstances of a pioneer country, coupled with the philosophy of the Declaration of Independence, have liberated the individual to an energy in pendence, have liberated the individual to an energy in self-expression attained by no other people until quite recent times. This, in turn, resulted, under Andrew Jackson, in an unprecedented development of democracy, placing all power in the hands of the plain people, an outcome which most of the framers of the Constitution apprehended and had sought to prevent.

The invention of the Federal Constitution, a compro-

mise between the states' rights and the need for union, enabled the immigrants from Europe to spread right across the country to the Pacific as citizens of one commonwealth and thereby freed them from the racial and interstate quarrels of their old continent. The energy they developed in freedom, together with the tremendous natural resources of the country, enabled them to build an economic structure which gives to the whole mass of the people the highest standard of living that has yet been

Geographical isolation, coupled with the Monroe Doctrine, enabled the American people to keep out of the constant international complications which have troubled most other lands and to devote the whole of their attention to their own problems. The result has been two experiments in social reform, namely, the tremendous equipment for education and the attempt to eliminate alcohol from the life of the community, which are now in course of being tried out.

Today, however, the earlier trend of American development is being almost reversed. The era of individual pioneers has passed, immigration has been checked, and the American community is being rapidly reorganized into a huge and an immensely complicated economic organism for the manufacture and distribution of commodities all over the world. The earlier enterprise of the pioneer finds expression partly in vigorous industrial competition, but also in a lawlessness among old and young which is one of the least admirable characteristics of modern American

Democracy, too, has not fulfilled all the hopes of its sponsors. Today it has resulted in politics and business playing down to the standards of the average man quite as much as in giving to the plain citizen the oppor-tunity to raise himself to the level of the best human models. The flattery which used to surround the court of the sovereign autocrat now breathes over the sovereign people, with equally bad results. The tremendous eduof knowledge and a good time rather than a real and disciplined capacity to think for themselves.

The abolition of poverty has brought in its train a new problem of wealth. The old simplicity of living is yielding to social distinctions based largely on wealth. While the

mass of the people are well off and have some capital, economic power is wielded more and more by those who inherit wealth and those who work for them, practically on monopolistic lines. The class of the idle rich is beginning to appear.

Finally, from being a relatively weak state, mainly

Finally, from being a relatively weak state, mainly anxious to be left to work out its own destiny in peace, the United States has become the most powerful nation in the world. She affects the lives of all other peoples by her economic power. The problem of world peace can obviously not be solved without her active co-operation.

Traveling about the United States one finds people with many different opinions about the great change in conditions which has taken place in the last twenty years. Many are profoundly concerned about the future of their country and with its apparent inability to devote its energies to anything save the increase of prosperity. country and with its apparent inability to devote its energies to anything save the increase of prosperity. Others are complacently optimistic that all is well with the best possible of lands. Some see nothing but corruption and the decline of old standards and the unheeding pursuit of dollars and pleasure. Others point to new achievements in invention and industry, to higher standards of prosperity, to an awakening interest in art and literature and criticism. literature and criticism.

To the outsider there seems to be great ground for confident hope, provided that people are awake to what is going on in their midst and think constructively and accurately about it. The United States has always been experimental. While other countries have moved forward cautiously in the light of tradition and experience, the United States, save in the sphere of the Constitution, has learned largely by the old road of making mistakes fearlessly. And that, also, except in the constitutional sphere.

it is doing today.

There is no doubt that the people of the United States today are moving into unknown country. The old United States of tradition, of the fathers and of the Civil War, has almost disappeared. With it has disappeared both the conditions and to some extent the virtues of the old order. The American people today are confronting not the pioneer conditions of the last century, but all the problems of a developed society which have confronted the leading peoples of Europe for decades.

They now have great power. They are, therefore, being tempted to abuse their power, to use it selfishly, inconsiderately, imperialistically, as other nations in the same position have been. They have great wealth. They are being tempted to luxury, to self-indulgence, to sensuality, as other rich nations have been. With the spread of knowledge the older theologies and orthodox religion have begun to lose their hold. They are being tempted to throw over the old moral restraints and the old spiritual inspiration for a new and fashionable infidelity and license. They are being tempted to leave monopoly alone if only it bribes them with ease and with comfort and

On the other hand the inner virtue of American civilization is at least as strong as ever. Its zeal for practical accomplishment, its constructive progressiveness, its humanity and equality, its belief in the marvelous possibilities of the individual, its receptivity to new ideas, its initiative and resourcefulness are going to enable it to lift up the economic standards of all mankind. Much of the deplored dollar-hunting is but a by-product of constructive business enterprise.

Moreover the younger generation, if undisciplined, is singularly honest, healthy, independent and fearless. There is little of the pharisee about its members. They have the qualities which will enable them to think their way through their country's problems, once they take them seriously. And there is still plenty of sound, moral instruction and fine example for those who seek it.

Notes from Southern Nigeria

THE town of Lagos is sometimes styled "the Bombay of West Africa," because it stands on an island. Although the island is large enough the population is huddled together at the western end where there are the best facilities for handling the produce which comes in canoes and launches from "up-country." The town is an unsightly conglomeration of narrow, evil-smelling streets and tin-roofed houses. Mud, corrugated iron (or "pan" cipal building materials. Of sanitation, there is none, but since 1924 there have been serious attempts made to clear up the worst quarters. Moreover, a town-planner has been procured and the air is full of fancy pictures of the beautiful city which is to be the Lagos of the future. Indeed, already a Greater Lagos is being developed on the mainland adjoining the island. A large number of the inhabitants of the town are to be removed to a new settlement which has been carefully planned with wide roads, markets, open spaces for recreation, to say nothing of a pure water supply and electric lights.

. + + + To make the removal as attractive as possible a canal is being dug from the main Lagos Lagoon to the center of the new settlement so that canoes may come up to the market with native foodstuffs which it is hoped will thus be obtained more cheaply than in the crowded markets of Lagos. When the congestion has been thus reduced on the island the remodeling of the town will be commenced. New motor roads and public parks and a pressure-pump system of drainage are among the chief improvements which are to be introduced. If one were talking about some progressive little town all this scheming might not be surprising, but this is Lagos, one of the chief slave ports on the coast not so very long ago. + + +

Of course all this work will cost money. There is to be a new bridge to the mainland which alone will cost millions of pounds sterling. Hitherto there has been no direct taxation in Lagos and its immediate neighborhood. Although almost all the provinces of Nigeria have been paying some form of direct taxation, for a number of years the inhabitants of Lagos have somehow escaped. The result has been that lazy fellows who have been unwilling to pay taxes in their hornes towns have delifted into willing to pay taxes in their home towns have drifted into Lagos to increase the congestion and to swell the ranks of unemployed laborers. In order, therefore, to put a stop to this undesirable state of affairs and to lessen the financial burden of the projected public works, we are to have income tax from April 1 next.

A somewhat sophisticated outlook on money matters was shown the other day by the beggars of Lagos. It had been proposed at a meeting of the Town Council that a charity fund should be inaugurated for the relief of the poor. Before taking any steps in the matter the opinion of the various religious bodies was asked as to the feasi-bility of such a scheme. A Muhammadan committee, when considering its answer, summoned the head of the professional beggars and asked him what he thought of the proposal. He replied that much as he and his fellow beggars appreciated the kindly interest in their welfare they would prefer street begging to any organized charity, as they believed the former would pay them better.

+ + + Taxation naturally is no more popular with a backward community than it is among the more progressive countries. It is even less popular. A government which is endeavoring to elevate an untrained population is constantly troubled by the difficulty of making its financial policy intelligible to the governed. It is not thirty years ago since the major part of the West African trade was carried on by means of barter or by using bags of cowrie shells as current coin. Twenty thousand cowries were worth about one dollar, so that if the dollar had to be transported more than a few miles its owner had to spend more than its face value in transport charges. Nowadays

coin is almost universally accepted by the native, but h certain backward parts the Government and the banks have considerable trouble. The illiterate native finds it hard to believe that twelve of the big shining nickel pen-nies are only the equivalent of one small, dull, alloy shilling. So when he brings his produce in to the trader he demands twelve pennies every time. Accumulating great quantities of them, he buries them for safety, ignorant of the fact that nickel deteriorates if left beneath the ground for long. For some time large quantities of nickel coin have been imported into backward areas, but the Govern-ment has now declared that the native must be encouraged to realize that size and weight are not the principal criteria of a coin's value and is cutting down the supply.

Letters to The Christian Science Monitor

Brief communications are welcomed, but The Christian Science Monitor Bditorial Board must remain sole judge of their suitability, and this Board does not hold tiself or this necespaper responsible for the facts or opinions presented. Anonymous letters are destroyed unread.

"How the News Is Handled" TO THE CHRISTIAN SCIENCE MONITOR:

We telegraphers greet with pleasure the recognition of our art as told on the editorial page of the Monitor in an article captioned "How the News Is Handled." Frankly less modest than your press telegrapher-correspondent, ma I add that your Morse-man lives in a world by him-self? Dots and dashes, although noise to others, are de-lightful music to him. Like the art of all things human, his, while passionately beloved by himself, is seldom

appreciated by those about him.

His experiences, too, are very dear to him. I am reminded of an occasion during the World War, when I was sitting at my telegraph instrument in a little front room on the ground floor of the building occupied by the Illinois State Journal, at Springfield, Ill. The Associated Press was sending dispatches concerning operations on the western front. An old, but tall and erect, snowy white-haired gentleman was standing back of me reading the bulletins. I looked up and smiled. He said: "Young man! Fifty-four years ago I stepped into this room. Right where you are sitting was a telegraph operator with instruments like yours. Where I am standing stood Abraham Lincoln reading the news bulletins of his election as President of the United States."

Your Morse telegrapher? You will not have him long. His time dates back when prairie schooners took up the journey "where the West begins." As the camera displaced the portraitist, so is the automatic telegraph printer replacing the operator and history will soon record the "last of the Morse-men," along with the passing of the red man and buffalo.
Chicago, Ill.
EUGENE SIXTEN SANDBERG.

"What News From Chicago!"

To THE CHRISTIAN SCIENCE MONITOR: Thank you for the editorial, "What News From

This is constructive journalism of the highest order and will greatly benefit the city and therefore the Nation. One might almost say that it will save the city

from itself.

Since the "headline artists" disregard the harm they do Chicago and the country by constantly and almost exclusively featuring crime and un-American news, your notation of some of Chicago's good work is very timely.

Chicago, Ill.

The Widespread Sale of Flasks To THE CHRISTIAN SCIENCE MONITOR:

As time goes on, I become more and more amazed at the continued widespread display of cocktail sets, flasks, and the like, in the stores of New York City.

Stores in which one would expect to find loyalty to the Government, offer as appropriate gifts for every occasion, articles glorifying the attractiveness of drinking—thereby keeping it in the public eye as the smart thing, and helping to prevent its early demise.

It seems to me that people should constantly protest to the store managers, until this practice has been entirely discontinued. (Mrs.) INEZ BARLOW BROWN.

New York N. Y.
